philosophy as a way of life this unique collection of essays on the late pierre hadot s revolutionary methodological approach to studying and practicing philosophy explores hadot s primary conviction that philosophy itself goes beyond solving puzzles and analyzing abstract arguments hadot believed that philosophy is a key part of humanity s search for happiness that it can transform our perception of the world and thus can alter our very mode of being his argument that the goal of philosophy is to shift our focus away from our habitual obsession with individuality and to embrace universality and objectivity has resonated with thinkers across the academy and outside it offering genuinely interdisciplinary analysis of hadot s work and philosophical practice this volume includes papers written from a gamut of philosophical historical and geographical

perspectives articles address issues in the history of philosophy from pythagoras to descartes by way of islamic thought thus corresponding to hadot s view of the importance of philologically based analysis of ancient texts and historical contexts others study the presence of ideas related to or influenced by hadot in contemporary thought from wittgenstein to leonard nelson analytic philosophy and french postmodernism the result is a wide ranging publication pointing to an additional third way alongside the traditional approaches of continental and analytic philosophy one that expands our horizons with secular spiritual exercises designed to enable us to be in a fuller more authentic way

one of the most influential social activists of the twentieth century a j muste is remembered by some as a pioneering labor leader by others for his work helping lay the foundations of the civil rights movement and by many others for his tireless work for peace justice economic equality and the protection of civil liberties as a pastor muste s life and work were shaped by his christian theology this collection of muste s sermons speeches articles and other works for religious audiences is a timely call for christians to follow him in the way of peace

the volume results from a seminar sponsored by the foundation for intellectual history at the herzog august bibliothek wolfenbüttel in 1992 starting with the theory of regressus as displayed in its most developed form by william wallace these papers enter the vast field of the renaissance discussion on method as such in its historical and systematical context this is confined neither to the notion of method in the strict sense nor to the renaissance in its exact historical limits nor yet to the aristotelian tradition as a well defined philosophical school but requires a new scholarly approach thus besides galileo zabarella and their circles which are regarded as being crucial for the emergence of modern science in the end of the 16th century the contributors deal with the ancient and medieval origins as well as with the early modern continuity of the renaissance concepts of method and with non regressive methodologies in the various approaches of renaissance natural philosophy including the lutheran and calvinist traditions

history of animals by aristotle translated by d arcy wentworth thompson book i 1 of the parts of animals some are simple to wit all such as divide into parts uniform with themselves as flesh into flesh others are composite such as divide into parts not uniform with themselves as for instance the hand does not divide into hands nor the face into faces and of such as these some are called not parts merely but limbs or members such are those parts that while entire in themselves have within themselves other diverse parts as for instance the head foot hand the arm as a whole the chest for these are all in themselves entire parts and there are other diverse parts belonging to them all those parts that do not subdivide into parts uniform with themselves are composed of parts that do so subdivide for instance hand is composed of flesh sinews and bones of animals some resemble one another in all their parts while others have parts wherein they differ sometimes the parts are identical in form or species as for instance one man s nose or eye resembles another man s nose or eye flesh flesh and bone bone and in like manner with a horse and with all other animals which we reckon to be of one and the same species for as the whole is to the whole so each to each are the parts severally in other cases the parts are identical save only for a difference in the way of excess or defect as is the case in such animals as are of one and the same genus by genus i mean for instance bird or fish for each of these is subject to difference in respect of its genus and there are

many species of fishes and of birds
