volume 1 christianity and monasticism have flourished along the Nile valley in the Sohag region of Upper Egypt from as early as the fourth century until the present day the contributors to this volume international specialists in Coptology from around the world examine various aspects of Coptic civilization in the Upper Egyptian Governorate of Sohag over the past seventeen hundred years many of the studies center on the person and legacy of the great

coptic saint shenoute the archimandrite 348 466 ce looking at his preserved writings his life his place in pachomian monasticism his relations with the patriarchs in alexandria and the life in his monastic system other studies deal with the art architecture and archaeology of the two great monasteries that he founded and the archaeological and artistic heritage of the region publisher s website

the rise and proliferation of arthurian prose romances in france in the thirteenth century is attested most notably by the enormous corpus of old french arthurian prose romances known as the vulgate cycle according to most scholars the vulgate cycle in its original form comprised three prose romances the roman de lancelot en prose the roman de la queste del saint graal and the roman de la mort le roi artu at a later stage two other prose romances conceived as preliminary works to the original trilogy were added to the cycle the estoire del saint graal and the vulgate merlin this group of old french arthurian romances has survived in nearly one hundred manuscripts and was translated into almost all major western european languages of the three extant middle dutch translations of the lancelot en prose orlanda lie has chosen the only verse translation preserved on two leaves of parchment the so called rotterdam fragments as the starting point for a comparison between the middle dutch the middle high german and the old french lancelot en prose versions in this comparative analysis only a small portion of the extensive lancelot en prose namely those sections that are parallel to the content of the rotterdam fragments will be involved the relation of the consulted french manuscripts to the dutch and german lancelot translations are ascertained in the light of insights gained from an investigation into the manuscript tradition of the lancelot en prose sections which qualify for a comparison with the two middle dutch fragments although the main emphasis of this study falls on the manuscript tradition of the lancelot en prose a brief discussion of some of the important

stylistic and structural characteristics of the Lancelot trilogy as a whole is presented especially since it is more than likely that the scope and complexity of the work has also influenced directly or indirectly its manuscript tradition. A diplomatic and a critical edition of the Rotterdam fragments as well as a translation in modern English are included in this volume.

Coptic contributions to the formative theological debates of Christianity have long been recognized. Less well known are other equally valuable Coptic contributions to the transmission and preservation of technical and scientific knowledge and a full understanding of how Egypt's Copts survived and interacted with the country's majority population over the centuries. Studies in Coptic culture attempt to examine these issues from divergent perspectives through the careful examination of select case studies that range in date from the earliest phases of Coptic culture to the present day. Twelve international scholars address issues of cultural transmission, cross-cultural perception, representation, and interfaith interaction. Their approaches are as varied as their individual disciplines, covering literary criticism, textual studies, and comparative literature as well as art history, archaeology, botany, and historical research methods. The divergent perspectives and methods presented in this volume will provide a fuller picture of what it meant to be Coptic in centuries past and prompt further research and scholarship into these subjects.
