harvard psychologist howard gardner has been acclaimed as the most influential educational theorist since john dewey his ideas about intelligence and creativity explicated in such bestselling books as frames of mind and multiple intelligences over 200 000 copies in print combined have revolutionized our thinking in his groundbreaking 1983 book frames of mind howard gardner first introduced the theory of multiple intelligences which posits that intelligence is more than a single property of the human mind that theory has become widely accepted as one of the seminal ideas of the twentieth century and continues to attract attention all over the world now in intelligence reframed gardner provides a much needed report on the theory its evolution and revisions he offers practical guidance on the educational uses of the theory and responds to the critiques leveled against him he also introduces two new intelligences existential intelligence and naturalist intelligence and argues that the concept of intelligence should be broadened but not so absurdly that it includes every human virtue and value ultimately argues gardner possessing a basic set of seven or eight intelligences is not only a unique trademark of the human species but also perhaps even a working definition of the species gardner also offers provocative ideas about creativity leadership and moral excellence and speculates about the relationship between multiple intelligences and the world of work in the future

is a high iq a prerequisite for a leader this volume brings together well known researchers in the field of intelligence who are investigating the multiple domains or facets of intelligence

gift

there's a book i recommend for everybody it's howard gardner's frames of mind it has helped me immensely robert greene author of the 48 laws of power what do we mean when we call someone smart that they are good at math and got a high score on the sat that they learn languages easily those traits might be what comes to mind first they are what underly psychology's classic definition of intelligence and what we are told in school that a smart person can do but they are not the whole story as howard gardner argues

in the groundbreaking classic frames of mind to limit our understanding of intelligence to book smarts misses much of what makes human beings amazing someone who plays an instrument well is exhibiting intelligence so too someone who knows how to do physical comedy is their mastery of their movements and the space around them not brilliant and to have a profound knowledge of their own self their relationships with others and relationships between others too is to show great intelligence as well gardner calls this the theory of multiple intelligences but this isn't just a book for intellectuals who want to argue about what intelligence is or educators debating how to teach it is for each of us in an era of teaching to the test and increasingly powerful artificial intelligence gardner's work is a celebration of all the ways there are to be human

in clear insightful prose rich with real life examples stankard discusses the multiple intelligences and how they enable readers to pray as they are and so develop a deeper friendship and intimacy with the god whose love transforms them
