covers structures and places as diverse as residences museums libraries and theaters hospitals and nursing homes churches air and truck terminals retail shops restaurants hotels industrial parks playgrounds and arenas this is a worthy competitor to architectural graphic standards it is illustrated with hundreds of plans diagrams tables and schematics which help in the design of more functional meaningful and interesting buildings de chiara and callender provide detailed information on the essential components of each building type emphasizing the characteristic functions involved this edition offers new information on facilities for such purposes as education justice and correction entertainment health and sports and recreation the book features special sections on housing for the elderly and the handicapped including access for the handicapped to public and government buildings

the 1st edition of time saver standards for building types has been an important part of my professional library since its publication in 1973 as stated in its preface it is intended to give basic design criteria for each major type of building it will give those unfamiliar with a specific building type a talking or working knowledge of its functions organization and major components over the years i have referred to time saver frequently for planning and design guidelines for building types such as gymnasiums airport terminals and police stations but as the 1st edition is now 17 years old and much of it is based on other even older versions of time saver standards i have begun to find the book inadequate for contemporary design practice the past two decades have been a period of profound change for building

planning and design many building requirements have changed and entire new categories of buildings have evolved it was with enthusiasm that i looked forward to the 3rd edition which the publisher promised would be revised expanded and completely brought up to date i am greatly disappointed with the result while the 3rd edition has been expanded to approximately 1400 pages nearly a third more than the 1st edition little of the original material has been revised and the updating has been insufficient

this edition of the major reference on graphic and design standards for landscape architecture has increased emphasis on environmental issues such as safe materials and construction techniques land reclamation and drainage and flood control

since its release in 1946 this has been one of the most widely recognized and respected resources for architects engineers and designers bringing together the knowledge techniques and skills of some of the most well known experts in the field the new eighth edition takes a fresh visual approach to the information architects need to access quickly helping them save time and money by assuring they get it right the first time readers will find timely new chapters on building security natural disaster mitigation building diagnostics facility management and much more

the silver bible thoroughly revised updated and redesigned interior designers architects and other design professionals can still turn to the field s beloved silver bible for a wealth of information related to the design and planning of residential and commercial interiors but now time saver standards for interior design and space planning second edition goes even further to truly make the classic interior design reference the standard in its field from standard furniture dimensions to architectural woodwork details you ll find a vast array of time saving data and details editors joseph dechiara julius panero and martin zelnik have brought together contributions from well known architectural and interior design firms to give you details derived from actual designs and working drawings showing various solutions for typical design problems encountered in interior architecture you get a wide range of typical layouts and residential spaces offices conference rooms and reception areas in addition to details of bars restaurants and public toilets this exciting new edition includes new international examples and metrification and

provides you with full coverage of healthcare spaces educational spaces home offices videoconferencing spaces green design project forms and schedules two outstanding sections cover historic styles and woodworking

an important addition to the time saver standards series this book offers top flight guidance for architects and builders who need to select any type of product system component material or assembly for any job provides easy to understand guidance on how various materials function considers key issues in product selection and offers general information on the full range of product types organized by csi masterformat the product specification system most commonly used in construction and in the sweet s catalogs cross referenced to the unformat system which indexes products by the sequence of assembly in design and construction a real plus when engaged in preliminary design and cost estimating

housing represents by far the largest segment of the construction industry this design reference is a volume of standard design criteria and specifications for nearly every conceivable type of housing built today

from the publishers of architectural graphic standards this book created under the auspices of the american planning association is the most comprehensive reference book on urban planning design and development available today contributions from more than two hundred renowned professionals provide rules of thumb and best practices for mitigating such environmental impacts as noise traffic aesthetics preservation of green space and wildlife water quality and more you get in depth information on the tools and techniques used to achieve planning and design outcomes including economic analysis mapping visualization legal foundations and real estate developments thousands of illustrations examples of custom work by today s leading planners and insider information make this work the new standard in the field order your copy today

this title looks at compliance with codes and regulations and provides general criteria for selecting type of product component or assembly it is intended as a

product selection guide for architects and builders

many communities across the nation still lack affordable housing and many officials continue to claim that affordable housing is an oxymoron building inexpensively is impossible they say because there are too many regulations required environmental impact statements and habitat protection laws they contend drive up the costs of construction but is this actually true in a comprehensive study of the question the authors of this eye opening book separate fact from myth with admirable clarity they describe the policy debate from its beginning review the economic theory trace the evolution of development regulation and summarize the major research on the topic in addition they offer their own research accompanied by a case study of two strikingly different washington d c suburbs they also include results of focus groups conducted in dallas denver and tucson the authors find that environmental regulatory costs as a share of total costs and processes are about the same now as they were thirty years ago even though there are far more regulations today they find too that environmental regulations may actually create benefits that could improve the value of housing although they conclude that regulations do not appear to drive up housing costs more now than in the past they do offer recommendations of ways in which the processes associated with regulations including review procedures could be improved and could result in cost savings intended primarily for professionals who are involved in or impacted by regulations from public officials planners and engineers to housing developers and community activists this book will provide useful insights and data to anyone who wants to know if and how american housing can actually be made affordable
