this book presents work on healthcare management and engineering using optimization and simulation methods and techniques specific topics covered in the contributed chapters include discrete event simulation patient admission scheduling simulation based emergency department control systems patient transportation cost function networks hospital bed management and operating theater scheduling the content will be valuable for researchers

and postgraduate students in computer science information technology industrial engineering and applied mathematics

teaching can be intimidating for beginning faculty some graduate schools and some computing faculty provide guidance and mentoring but many do not often a new faculty member is assigned to teach a course with little guidance input or feedback teaching computing a practitioner s perspective addresses such challenges by providing a solid resource for both new and experienced computing faculty the book serves as a practical easy to use resource covering a wide range of topics in a collection of focused down to earth chapters based on the authors extensive teaching experience and his teaching oriented columns that span 20 years and informed by computing education research the book provides numerous elements that are designed to connect with teaching practitioners including a wide range of teaching topics and basic elements of teaching including tips and techniques practical tone the book serves as a down to earth practitioners guide short focused chapters coherent and convenient organization mix of general educational perspectives and computing specific elements connections between teaching in general and teaching computing both historical and contemporary perspectives this book presents practical approaches tips and techniques that provide a strong starting place for new computing faculty and perspectives for reflection by seasoned faculty wishing to freshen their own teaching

in 1957 stephen smale startled the mathematical world by showing that in a theoretical sense it is possible to turn a sphere inside out a few years later from the beaches of rio he introduced the horseshoe map demonstrating that simple functions could have chaotic dynamics his next stunning mathematical accomplishment was to solve the higher dimensional poincare conjecture thus demonstrating that higher dimensions are simpler than the more familiar three in 1966 in moscow he was awarded the fields medal the most prestigious prize in mathematics smale s vision and influence extended beyond mathematics into two vastly different realms in 1965 in berkeley he initiated a program with jerry rubin of civil disobedience directed at ending the vietnam war and as a mineral collector he accumulated a museum quality collection that ranks among the finest in the world despite these diverse accomplishments smale s name is virtually unknown outside mathematics and mineral collecting one of the objectives of this book is to bring his life and work to the attention of a larger community there are few good biographies of mathematicians this makes sense when considering that to place their lives in perspective requires some appreciation of their theorems biographical writers are not usually trained in mathematics and mathematicians do not usually write biographies though the author steve batterson is primarily a mathematician he has long been intrigued by the notion of working on a biography of smale in this book batterson records and makes known the life and accomplishments of this great mathematician and significant figure in intellectual history

a texas style introduction to proof is an ibl textbook designed for a one semester course on proofs the bridge course that also introduces tex as a tool students can use to communicate their work as befitting textless text the book is as one reviewer characterized it minimal written in an easy going style the exposition is just enough to support the activities and it is clear concise and effective the book is well organized and contains ample carefully selected exercises that are varied interesting and probing without being discouragingly difficult

this book constitutes the thoroughly refereed post conference proceedings of the 8th international conference on high performance computing for computational science vecpar 2008 held in toulouse france in june 2008 the 51 revised full papers presented together with the abstract of a surveying and look ahead talk were carefully reviewed and selected from 73 submissions the papers are organized in topical sections on parallel and distributed computing cluster and grid computing problem solving environment and data centric numerical methods linear algebra computing in geosciences and biosciences imaging and graphics computing for aerospace and engineering and high performance data management in grid environments

in 2000 the american mathematical society published a biography of professor stephen smale who had recently retired from a prestigious career at the university of california berkeley but in retirement professor smale has continued his academic pursuits through the present day resulting in numerous additional publications and honors in the past 20 years as part of the cityu legacy series this book documents professor smale s time at city university of hong kong during his first appointment as a distinguished university professor in the department of mathematics from 1995 2001 as well as when he returned from 2009 2016 it also covers colorful and adventurous aspects of his life including his impressive mineral collection and intrepid sailing and hiking trips to exotic locales so that readers can experience the full extent of professor smale s notable life and work the previous biography about him is included to provide a complete picture of this renowned scholar of international influence a fascinating and inspiring story of how steve smale a bright yet seemingly unexceptional country boy became one of the most brilliant and in influential mathematicians on the planet lenore blum distinguished career professor of computer science emerita carnegie mellon university i first met steve during a visit to berkeley i did not foresee that the visit would mark the beginning of a long lasting relationship including but going well beyond mathematical collaboration felipe cucker emeritus professor department of mathematics city university of hong kong
