QuestionAnswer What are the main features of the Earth's interior according to 'Total Geography' for ICSE Class 10? The Earth's interior is divided into three main layers: the crust, mantle, and core. The crust is the outermost solid layer, the mantle is semi-solid and convective, and the core is composed of a liquid outer core and a solid inner core, rich in iron and nickel. How does 'Total Geography' explain the process of plate tectonics and continental drift? The book explains that the Earth's lithosphere is divided into tectonic plates that move due to mantle convection currents. This movement causes continental drift, leading to the formation of mountains, earthquakes, and volcanoes, shaping the Earth's surface over time. What are the different types of rocks discussed in 'Total Geography' for ICSE Class 10? The textbook categorizes rocks into three types: Igneous (formed from cooled magma), Sedimentary (formed from sediments), and Metamorphic (formed from existing rocks subjected to heat and pressure). How does 'Total Geography' describe the distribution of natural resources across India? The book details that India is rich in minerals like coal, iron ore, bauxite, and limestone, with their distribution influenced by geological processes. Resources are unevenly distributed, with certain regions being resource-rich like Jharkhand for coal and Odisha for bauxite.

5 What are the key concepts of climate and weather covered in 'Total Geography' for Class 10? The textbook explains the difference between weather and climate, factors affecting climate (like latitude, altitude, pressure systems, and monsoons), and the impact of climate on agriculture, economy, and lifestyle in India.
