the air conditioning manual assists entry level engineers in the design of air conditioning systems it is also usable in conjunction with fundamental hvac r resource material as a senior or graduate level text for a university course in hvac system design the manual was written to fill the void between theory and practice to bridge the gap between real world design practices and the theoretical calculations and analytical procedures or on the design of components this second edition represents an update and revision of the manual it now features the use of si units throughout updated references and the editing of many illustrations helps engineers quickly come up with a design solution to a required air conditioning system includes issues from comfort to cooling load calculations new sections on green hvac systems deal with hot topic of sustainable buildings

this expanded edition of david chadderton s air conditioning is a textbook for undergraduate courses in building services and environmental engineering and for btec continuing education diploma higher national diploma and certificate courses in building services engineering it will also be of considerable help to students on national certificate and diploma programmes the book includes a new chapter on application of fans to airduct systems

the purpose of this text is to provide the environmental control professional with a clear understanding of the operation of electrical and electronic components and systems that are utilized in control functions

automotive air conditioning and climate control systems is a complete text and reference on the theoretical practical and legislative aspects of vehicle climate control systems for automotive engineering students and service professionals it provides the reader with a thorough up to date knowledge of current a c systems refrigerants and the new possible

replacement systems like co2 and includes unrivalled coverage of electronic and electrical control filling the gap in the automotive engineering and servicing market for students and those training on the job this book will help both newcomers and those with more experience of air conditioning systems maintenance engineering to keep up with the latest developments and legislation detailed coverage of european and us vehicle hvac systems thorough explanation of current and future systems including co2 meets relevant c g imi and hnd vocational and professional qualifications imi recommended reading material includes practical cases studies and examples from design and manufacturing companies including ford vauxhall toyota vw visteon sanden and others accompanied by over 300 detailed illustrations and photographs
