last year i addressed the netherlands comparative law association with the following question does comparative law exist at all my intention then was to flog the dead horse of the merger of comparative law and the sociology of law in presenting this voluminous collection of netherlands national reports to the eleventh congress of the international academy of comparative law i feel my misgivings giving way to the suspicion that comparative law indeed exists of course national reports do not as such prove the existence of comparative law it is the general reports together with the national reports which embody the comparative effort that is why the netherlands comparative law association took the initiative to propose the publishing of the materials on a subject to subject basis instead of publishing collections of national reports from a comparative

legal point of view it is the topic that should form the basis of the publication and not the origin of the materials the general reporter for each topic should be prepared to take up the responsibilities of editing the volume and would have to be given the right to select those national reports which he considers to be useful both in regard to their quality and the relevance of the material to the basic problems in the questionnaire this proposal met with very favourable comments from the national committees and general reporters of some fifteen countries

this volume features a critical edition of the recently rediscovered manuscripts written by the french philosopher louis couturat 1868 1914 it includes the transcriptions of three of his believed to be lost manuscripts first the cours de caen 1898 99 on various systems of symbolic logic second his lecture at the collège de france histoire de la logique formelle moderne and third his textbook on mathematical logic the manuscripts document the early reception of mathematical logic in france and provide insights into the first introduction of the french reader to the work of gottlob frege and bertrand russell it is the aim of the editors of this volume to contribute to the history of symbolic logic particularly the history of its dissemination and its teaching in france at the same time the volume contributes to an alternative history and conception of philosophy in which semiotics and concrete mathematical practice stand in focus the book is interesting for students and researchers in the history of philosophy mathematics and logic

the present publication is a continuation of two earlier series of chronicles philosophy in the mid century firenze 1958 59 and contemporary philosophy firenze 1968 edited by raymond klibansky as with the earlier series the present surveys purport to give a survey of significant trends in contemporary philosophical discussion the need for such surveys has i believe increased rather than decreased over the last years the philosophical scene appears for various reasons rather more complex than ever before the continuing process of specialization in most branches the emergence of new schools of thought particularly in philosophical logic in the philosophy of language and in social and political philosophy the increasing attention being paid to the history of philosophy in discussions of contemporary problems as well as the increasing interest in cross cultural philosophical discussion are the most important contributory factors surveys of the present kind are a valuable source of knowledge about this complexity and may as such be of assistance in renewing the understanding of one's own philosophical problems the surveys it is to be hoped may help to strengthen the socratic element of modern philosophy the world wide dialogue or kommunikationsgemeinschaft so far six volumes have been prepared for the new series the present surveys in asian philosophy vol 7 follow the surveys in the philosophy of language and philosophical logic vol i philosophy of science vol 2 philosophy of action vol 3 philosophy of mind vol 4 african philosophy vol 5 and

medieval philosophy part 12 vol 6

this book presents comparisons of recent accounts in the formalization of natural language dynamic logics and formal semantics with informal conceptions of interaction dialogue natural logic and attribution of rationality that have been developed in both psychology and epistemology there are four parts which explore historical and systematic studies the formalization of context in epistemology the formalization of reasoning in interactive contexts in psychology the formalization of pathological conversations part one discusses the erlangen school which proposed a logical analysis of science as well as an operational reconstruction of psychological concepts these first chapters provide epistemological and psychological insights into a conceptual reassessment of rational reconstruction from a pragmatic point of view the second focus is on formal epistemology where there has recently been a vigorous contribution from experts in epistemic and doxastic logics and an attempt to account for a more realistic cognitively plausible conception of knowledge the third part of this book examines the meeting point between logic and the human and social sciences and the fourth part focuses on research at the intersection between linguistics and psychology internationally renowned scholars have contributed to this volume building on the findings and themes relevant to an interdisciplinary scientific project called diafor dialogue rationality formalisms which was hosted by the msh lorraine lorraine institute for social sciences and humanities from 2007 to 2011
