a collection of thirteen lectures all given near the end of joseph campbell s life that examine the great sweep of mythological development around the world and across the ages

hercules zeus thor gilgamesh these are the figures that leap to mind when we think of myth but to david leeming myths are more than stories of deities and fantastic beings from non christian cultures myth is at once the most particular and the most universal feature of civilization representing common concerns that each society voices in its own idiom whether an egyptian story of creation or the big bang theory

of modern physics myth is metaphor mirroring our deepest sense of ourselves in relation to existence itself now in the world of myth leeming provides a sweeping anthology of myths ranging from ancient egypt and greece to the polynesian islands and modern science we read stories of great floods from the ancient babylonians hebrews chinese and mayans tales of apocalypse from india the norse christianity and modern science myths of the mother goddess from native american hopi culture and james lovelock s gaia leeming has culled myths from aztec greek african australian aboriginal japanese moslem hittite celtic chinese and persian cultures offering one of the most wide ranging collections of what he calls the collective dreams of humanity more important he has organized these myths according to a number of themes comparing and contrasting how various societies have addressed similar concerns or have told similar stories in the section on dying gods for example both odin and jesus sacrifice themselves to renew the world each dying on a tree such traditions he proposes may have their roots in societies of the distant past which would ritually sacrifice their kings to renew the tribe in the world of myth david leeming takes us on a journey not through a maze of falsehood but through a marvellous world of metaphor metaphor for the story of the relationship between the known and the unknown both around us and within us fantastic tragic bizarre sometimes funny the myths he presents speak of the most fundamental human experience a part of what joseph campbell called the wonderful song of the soul s high adventure

alien life and human purpose a rhetorical examination through history provides a rhetorical examination of the way major historical figures connect their arguments for the absence of alien life or unity to their philosophical religious and ethical agendas although the unity myth has often existed in the background of society shaping institutions and values during periods where relativism gained prominence its opponents actively wielded the unity myth as a response plato used the unity myth against the sophists anglican theologian and philosopher william whewell against the utilitarians co discoverer of evolution alfred russell wallace against the social darwinists university professors frank j tipler and john d barrow against the postmodernists etc these individuals presented scientific defenses of unity and then used the fact of unity to claim the universe is teleological knowable and ordered rather than chaotic and relativistic this book argues that unity and its complimentary mythic function have played an important role in shaping values throughout history and more importantly continue to do so today

peregrinations ruminations and regenerations a critical approach to doctor who examines the famous bbc science fiction show as a cultural artifact in dialogue with other science fiction with politics and religion and with the culture at large both in terms of how it reflects and comments upon that culture and in terms of the audience and the peculiarities of its response this book enables researchers in film and media to make historical industrial aesthetic and ideological connections between and among doctor who and other shows and historical events since its inception in 1963 this volume is a new entry in a relatively new area as the young fans of doctor who have matured and as many have become scholars they are

returning to the show to consider it from a scholarly perspective it is also of use in the media studies classroom to address directly the issues presented by the longest running science fiction show in the history of the medium peregrinations ruminations and regenerations considers not only cultural ramifications and connections but audience studies as well
