excerpt from an approach to business problems before a science of business can take shape there must first be build up a system of business practice the methods plans and rules of the most efficient organizations must be brought together tested and compared and the most effective must be selected and coordinated some of this work has been done trade associations universities periodicals and various governmental agencies have been studying the details of production and distribution but up to the present no plan for the guidance of the student in the maze of business practice has been offered to supply this deficiency to discover a classification molded on the living activities of business to supply a uniform method of approach to business problems in whatever form they may arise and to illustrate the application of this method to typical problems including those involving the relations of business to society these are the purposes of this book i need hardly say that in all this the book makes no claim to finality if the classification and the uniform method should do no more than suggest improvements upon themselves the work i feel would have been worth while
