like most good educational interventions problem based learning pbl did not grow out of theory

but out of a practical problem medical students were bored dropping out and unable to apply what they had learned in lectures to their practical experiences a couple of years later neurologist howard s barrows reversed the sequence presenting students with patient problems to solve in small groups and requiring them to seek relevant knowledge in an effort to solve those problems out of his work pbl was born the application of pbl approaches has now spread far beyond medical education today pbl is used at levels from elementary school to adult education in disciplines ranging across the humanities and sciences and in both academic and corporate settings this book aims to take stock of developments in the field and to bridge the gap between practice and the theoretical tradition originated by barrows that underlies pbl techniques

when we have a problem most of us zero in take it apart and focus until we have it solved steven spielberg tried that when the scenes with his expensive prosthetic shark just weren t scary psychologist social scientist and million selling author david niven shows us that focusing on the problem is exactly the wrong way to find an answer and jaws built its famous menace precisely because the shark hardly ever appears in shot putting problems at the centre of our thoughts shuts down our creative abilities depletes stamina and feeds insecurities niven shows how working harder and having absolute confidence in finding a solution actually hides answers it s not about the shark shows how to transform your daily life with a simple but rock solid principle if you start by thinking about your problems you ll never make it to a solution if you start by thinking about a solution you ll never worry about your problems again
