for years higher education prospered it loudly proclaimed that college graduates command far greater lifetime incomes ample funding followed we produced but that argument has begun to sour a college degree has long since stopped being a guarantee of prosperity or even job security society has begun to question its support for universities in this environment mathematicians and all academics must begin to change compete and seek resources that will be used with greater care it is the only solution if we hope to maintain the integrity of the enterprise i want to offer advice to department heads out there i want to try to educate the rank and file about a variety of aspects of the job of being a department head i also want to tell you my opinion about this job and perhaps also a little about love death and the vagaries of the human condition from the preface this unique book presents a witty well written personal view about the experience of being a department head those in academia will profit from the author s inside view and other department heads and chairs new and old will benefit from the experiences of this keenly observant colleague

since the summer of 1973 when i became a burroughs research fellow my life has been very different from what it had been before the daily routine changed instead of going to the university each day where i used to spend most of my time in the company of others i now went there only one day a week and was most of the time that is when not travelling alone in my study in my solitude mail and the written word in general became more and more important the circumstance that my employer and i had the atlantic ocean between us was a further incentive to keep a fairly complete record of what i was doing the public part of that output found its place in what became known as the ewd series which can be viewed as a form of scientific correspondence possible since the advent of the copier that same copier makes it hard to estimate its actual distribution i myself made about two dozen copies of my texts but their recipients were welcome to act as further nodes of the distribution tree the decision to publish a selection from the ewd series in book form was at first highly embarrassing but as the months went by i got used to the idea as soon as some guiding principles had been adopted preferably not published elsewhere as varied and as representative as possible etc
