the project on national security reform submitted its 2 year study of the national security system forging a new shield to the president president elect and congress on november 26

2008 before the project finalized the report's recommendations its vision working group tested the findings against a diverse set of scenarios to determine if the recommendations were robust and effective this volume documents the scenario testing process used by the vision working group and includes the actual pre reform and post reform scenarios and details many other scenario techniques used in the overall study results revealed that each of the five major findings improved the performance of the current national security system but on the whole the findings concluded that the national security system was at risk of failure and needed serious reform the work of the vision working group has led to the formulation of an additional recommendation the country must establish a mechanism to infuse greater foresight into the executive branch and in particular the national security system this proposed mechanism named the center for strategic analysis and assessment would exist and operate within the executive office of the president this volume details the proposed architecture and operation of the center

the primary objective of the book is to provide decisionmakers the insight and means to apply this technique in changing the way they think about and plan for the future scenario based strategy both confronts and deals with uncertainty and leads to a strategy that is focused but resilient specific but flexible the handbook guides readers step by step through the sequence and intricacies of a scenario project and the subsequent strategic decision making it explains what scenarios are and are not when they are needed as well as their uses and benefits it also deals with cultural and organizational changes that an organization must undertake to maximize the benefits of scenario based planning

in a world characterized by increased complexity and uncertainty organizations today struggle to be strategically prepared for unexpected change of course the strategist's job has traditionally involved an attempt to anticipate changes in the environment and to develop capabilities that will allow the organization to continue to thrive under new and different circumstances but what if change cannot be anticipated with any degree of certainty and what if change is so complex that its effects and implications can never be fully understood much less anticipated what if anything can organizations do to become more strategically prepared for unexpected change this book explores the overall response to these difficult questions and argues that people in organizations become more strategically prepared for the unexpected when they cultivate practical wisdom

this volume provides a good sample of the many issues that are dealt with in the context of iwrn
