just as space territory and society can be socially and politically co constructed so can water and thus the construction of hydraulic infrastructures can be mobilised by politicians to consolidate their grip on power while nurturing their own vision of what the nation is or should become this book delves into the complex and often hidden connection between water technological advancement and the nation state addressing two major questions first the arguments deployed consider how water as a resource can be ideologically constructed imagined and framed to create and reinforce a national identity and secondly how the idea of a nation state can and is materially co constituted out of the material infrastructure through which water is harnessed and channelled the book consists of 13 theoretical and empirical interdisciplinary chapters covering four continents the case studies cover a diverse range of geographical areas and countries including china cyprus egypt ethiopia france nepal and thailand and together illustrate that the meaning and rationale behind water infrastructures goes well beyond the control and regulation of water resources as it becomes central in the unfolding of power dynamics across time and space

research results discussed in this book demonstrate that effective water management tools and decision making practices are needed to support interventions to increase availability and manage demand for scarce water supplies furthermore the book bridges the gap between ideas and actions endorsed in the research oriented environmental debate and their translation into policymaking structures and programs in developed and developing countries

the eastern mediterranean is once again in turmoil in addition to proxy wars in syria and iraq and the occupation of cyprus there is no president or functioning government in lebanon which is also in the midst of an open conflict with israel in the south furthermore turkey is threatening its neighbours israel is faced with daily security issues the sinai peninsula is no longer safe the refugee problem is adding to the region s woes and the rule of international law is being increasingly violated the arrival in the region of a new powerful world player russia and of an indomitable regional player iran has further upset the balance in the eastern mediterranean the economies of the region are also confronted with serious problems greece and cyprus are under troika supervision even if cyprus s program is in

theory ending soon the egyptian economy is failing to meet its potential with its per capita gdp stuck at the bottom of the international rung even the turkish economy is showing signs of fatigue with the value of the turkish lira against the dollar taking a nosedive and the russian embargo beginning to bite israel is doing better than its neighbours but continues to carry a heavy defence burden however the region has a habit of bouncing back and newly discovered energy reserves are now giving the eastern mediterranean hope if properly handled energy can help unite the countries in the region and turn the eastern mediterranean into a peaceful and harmonious network there are however two main obstacles that must be overcome namely the palestinian problem and the occupation by turkey of 37 of cyprus territory syria would also need to take the path to peace free of terrorism and violence working together on energy resources would help countries of the eastern mediterranean see their neighbours as natural allies rather than as antagonists and proxies of some foreign power this book proposes the creation of a high energy authority that would enable all countries in the region to exploit their energy reserves together this concept would create economic advantage and reduce conflict and hegemonic dependence
