the age of discovery explores one of the most dramatic features of the late medieval and early modern period when voyagers from western europe led by spain and portugal set out across the world and established links with africa asia and the americas this book examines the main motivations behind the voyages and discusses the developments in navigation expertise and technology that made them possible this second edition brings the scholarship up to date and includes two new chapters on the important topics of the idea of discovery and on biological and environmental factors which favoured or limited european expansion

the age of exploration which spanned roughly from 1400 to 1550 was the first time in history that european powers eyeing new trade routes to the east or seeking to establish empires began actively looking far past their own borders to gain a better understanding of the world and its many resources the individuals who set out on behalf of the countries they represented came from a variety of backgrounds and included master navigators such as christopher columbus and ferdinand magellan the latter of whom was the first to circle the globe as well as the often ruthless conquistadors of the new world such as francisco pizarro and hernan cortes the exciting and sometimes tragic lives and journeys of these and many others as well as the battles for empire that arose are chronicled in this engaging volume

the age of discovery began in the early part of the 15th century and carried on through most of the 17th century it is sometimes also referred to as the age of exploration this was a time when the people of europe began to travel discover and explore more of the world than ever before mapping and naming the places they found

embark on a thrilling voyage through the age of discovery with the age of discovery navigating the world s great explorations delve into a pivotal era that reshaped our world as european powers sought new trade routes to the orient from the daring voyages across vast oceans to the conquests of distant lands this book captures the essence of exploration follow in the footsteps of iconic figures like christopher columbus and hernando cortez as they navigated the unknown driven by the pursuit of riches and empire through a blend of captivating primary sources and insightful analysis uncover the profound impact of these expeditions on modern civilization from the subjugation of native peoples to the acquisition of riches witness the complexities of this transformative age the

age of discovery offers a compelling journey through history that illuminates the enduring legacy of exploration prepare to set sail on an unforgettable adventure into the heart of one of humanity's most fascinating epochs

the age of discovery was a time of exploration and developing new ideas when europeans first travelled across the seas to other lands in his warm and expressive style charles kovacs tells stories of key historical figures from the crusades to the renaissance including saladin joan of arc columbus magellan queen elizabeth i and francis drake and draws out the interrelation of world events this revised edition of a classic text is an engaging resource for teachers and home schooling parents this historical period is traditionally covered in class 7 age 13 14 of the steiner waldorf curriculum

the history of the age of discovery has long been questioned by scholars and laypersons the era erupted onto history suddenly what spurred europeans on to go to sea how did columbus obtain his inspiration to sail west to reach china or india indeed even experts cannot agree on where he was going was it really india or china or was it japan cipangu we're told that he carried with him a letter for the great khan who had not existed for 100 years and a translator who spoke arabic why arabic did the indians chinese or japanese speak arabic then as if by miracle while it took the portuguese 80 years to struggle down the western african coast to reach the cape of good hope it took columbus merely a few months to discover the caribbean it is all too fantastic yet we accept it as history do you know how hard it is to sail the world's oceans today we have all kinds of devices to help us navigate the treacherous waters we have satellite guidance for navigation and sonar to detect hazards for instance then as all sailboat owners know you must take sailing classes in order to obtain a sailing permit to tell us that in the 15th century europeans explorers went to sea en masse and discovered all sorts of lands hitherto unknown to them at a time when many people thought the earth was flat and that the atlantic ocean called the sea of darkness was not to be ventured in is a hard sell yet the europeans did go to sea and they did reach these lands so the question remains why did they do it and how did they do it what made them suddenly want to explore and how did they know how to sail the oceans we're in the 21st century we can now sail to the outer edges of the solar system and beyond divine inspiration as an explanation no longer cuts it as it were the answer is simple the conundrum is only the result of our historians refusing to look beyond their own culture if we turn the history book page and look at that of other peoples in this world besides europeans we see the other parts of the picture there were others that sailed the oceans too and they had been doing it a lot earlier than europeans they braved

the trails and passed on to the europeans their maritime knowledge in early 15th century the chinese launched an epic maritime program headed by the legendary admiral zheng he a magnificent chinese fleet consisting of some 200 ocean going ships built using the most advanced naval technologies the world had seen braved the world s oceans for almost 30 years most western scholars are unaware of this grand event however the european intelligentsia and mapmakers of the age of discovery knew about it they did not know who these ancient argonauts were but they had records of their enterprise it is these documents that incited and enabled the european explorers to go to sea nah nonsense but it s not nonsense it is not even speculation the records are there in european hands this book is the research into those records that evidence through diligent and meticulous analyses a lost history is reconstructed the hundreds years old records are deciphered and the real history has emerged it tells of a glorious and intriguing story and the whole saga reads like a whodunit if ever there is a page turner this is one the history reconstruction effort is not merely to explain what made columbus do what he did it bears on history itself it is intimately tied to the explosion of western science and technologies and the blossoming of the renaissance ultimately the rise of the west and its domination of the world putting it succinctly this book is simply a must read for all historians and knowledge seekers regardless of nationality

covers the period during which europe discovered the rest of the world beginning with the mid fifteenth century and ending 250 years later when the reconnaissance was all but complete the author examines the inducements political economic religious to overseas enterprise at the time and analyzes the nature and problems of the various european settlements in the new lands
