s2s introduces the 2nd edition of the only step 1 review series dedicated to clinical vignettes each underground clinical vignettes book presents 100 frequently tested diseases with thousands of classic buzzwords in hx pe lab imaging and pathology

overview the purpose of this series is to provide students with short vignettes

written in board format to review material in the basic sciences each book covers a specific topic and covers an array of most commonly seen topics on the boards this series is not intended to be a complete review but rather a supplement to course material and other review books for this reason it is important to keep the books small under 125 pages and inexpensive topics covered in the step one series are anatomy behavioral science biochemistry microbiology virology immunology parasitology previously named microbiology i microbiology bacteriology previously named microbiology ii pathophysiology pulmonary system previously named pathophysiology i pathophysiology gi system previously named pathophysiology ii pathophysiology cardiovascular system previously named pathophysiology iii and pharmacology incorporate better templated format that reflects a lighter more systematic approach trim size will be reduced to 6 x 9 to better fit in a white coat pocket index included with each book an appendix of lab values with each book discussion and treatment for each vignette will be included on a separate page for easier self quizzing captions at the end of the page will be hidden to facilitate self quizzing mnemonics will be added as a separate pedagogical feature 4 color inserts in each book will omit the need for the accompanying color atlas reviewer quotes this is a good supplement to second year pathology and preparation for boards and shelf exams perfect for fragmentary reading while waiting for an elevator or on the minute or two before the lecture starts allows the student to capture this time that is otherwise lost for productive use ms2 texas tech i think that this approach will help me on the usmle a lot more than studying from a more detailed text this is much more focused and provides an understanding of clinical cases unlike most biochemistry lectures just memorizing a lot of facts it seems designed for those who want to kill the boards rather than just pass ms2 ucla this book is best used for either studying for the boards or for class supplementation in addition for owners readers of the first aid for the usmle step 1 the ucv series is an unparalleled complement ms2 mount sinai school of medicine
