research is increasingly becoming more influential in the field of education and this handbook brings together a range of top academic experts who represent diverse fields within and outside of education as well as quantitative qualitative and mixed method

approaches to provide an upto date advanced analysis of all relevant issues involved in educational research the handbook is written in lively welcoming prose and central to the handbook is an intention to encourage and help researchers place ideas at the epicenter of inquiry in addition explicit discussion of the fundamental challenges that researchers must consciously address throughout their inquiry are identified and solutions provided to help future researchers overcome similar obstacles

not that long ago there were fairly clear divisions between researchers at different stages throughout their career starting with doctoral students then progressing to postdoctoral workers and finishing with academic staff however more recently the term early career researcher ecr has been introduced partly as a response to their growing importance which has been reflected by their increased respect and status shown by national international and funding bodies there are several common features of an ecr s job including the need to establish a professional identity and develop into an independent researcher competing for grants and increasing one s output of research publications this book offers proven practical advice to help ecrs kick start a successful academic career with advice on choosing research topics making best use of a research supervisor mentor developing your research writing getting published journals and books writing a research grant fellowship becoming a supervisor becoming a teacher and developing your career this guide will help academics at the start of their career no matter what discipline they are engaged in arts humanities sciences or social sciences for example in sciences and engineering ecrs are commonly part of a large research team and often have to work in collaborative groups requiring strong interpersonal skills but can lead to tension in the interaction with one s supervisor or mentor in contrast in the arts and humanities and perhaps the social sciences an ecr is more likely to be an independent scholar with a requirement to work alone leading to a different type of relationship but not necessarily any less stressful with one s supervisor or mentor using case studies from across the subject areas to illustrate key points and give suitable examples this vital guide will help all early career academics

first published in 1986 social science and social policy addresses major questions concerned with the social utility of social science the book is divided into four parts the first part considers the place of social science in the policy making process and criticizes the rational model which gives a central place to analysis in part two five different methodologies for policy research are considered the use of continuous surveys public opinion polls social indicators evaluation research and social experimentations and the use of

qualitative methods the advantages and drawbacks of each are considered with extensive use of examples in the third part the role of theory is examined particular attention is paid to the issue of health inequality in part four general questions are raised about the use and abuse of social science including questions about how it can be most effectively disseminated to make maximum impact the book is aimed at a general readership and requires no special methodological expertise it will appeal particularly to undergraduates and graduate students taking courses in social policy public policy applied sociology and a range of applied social sciences such as criminology health studies education and social work
