regulation has become a central aspect of contemporary governance as a result of public management reforms over recent decades yet for all its ubiquity the ideas of regulation have become increasingly contested key failures in the regulation of areas such as financial markets nuclear power and food safety have revealed limitations in strategies which were once praised as offering superior problem solving solutions this major new text introduces the issues which affect the design and operation of regulatory regimes and assesses the different regulatory strategies which can be used to deal with real world challenges in doing so it examines the most important areas in regulatory policy and reform including rule making and enforcement better regulation infrastructure regulation international regulation and risk regulation throughout the book martin lodge and kai wegrich discuss a range of hypothetical and real world examples to illustrate key issues options and trade offs and to encourage readers to think critically and creatively about the regulatory options which are available drawing on the most up to date research this text provides a clear and useful toolkit for thinking analytically about regulation

this book provides an account of the international emergence of corporate manslaughter offences to criminalise deaths in the workplace during the last twenty years identifying the limitations of health and safety regulation that have prompted this development

the past decade has witnessed a proliferation of regulatory agencies at both the national and the eu level this coherent and clearly structured book is the first of its kind to analyse in equal measure and interdependently both national regulatory authorities and european agencies it brings together a select group of highly esteemed contributors authorities in their fields to provide a systematic and over arching view of regulation in the eu unlike many of the previous attempts to shed light on this increasingly opaque and complex co existence of regulatory systems this book takes a genuinely multi disciplinary approach with integrated perspectives from law politics and economics

an examination of the relationship between competition and the deregulation and liberalisation of the us and european air

transport sectors reveals that the structure of the air transport sector has undergone a number of significant changes a growing number of airlines are entering into horizontal and vertical cooperative arrangements and integration including franchising codeshare agreements alliances virtual mergers and in some cases mergers with other airlines groups of airlines or other complementary lines of business such as airports this book considers the current legal issues affecting the air transport sector incorporating recent developments in the industry including the end of certain exemptions from eu competition rules the effect of the eu us open skies agreement the accession of new eu member states and the lisbon treaty the book explores the differing european and us regulatory approaches to the changes in the industry and examines how airlines have remained economically efficient in what is perceived as a complex and confused regulatory environment competition and regulation in the airline industry will be of particular interest to academics and students of competition law as well as eu law

this book presents the first in depth analysis of the export of the eu electricity acquis through the imposition of an eu type regional electricity market rem in see within the enlargement process among other germane issues the author discusses the following the suitability of the european model of electricity markets liberalization for economies in transition the use of the public services obligations pso to address the impact of electricity markets liberalization the use of regulated prices and measures for granting priority rights for cross border capacity allocation as psos the court of justice judgement in federutility on the sustainability of states protection of their different types of customers including the large businesses the energy community as a step towards a pan european energy community the effect of simultaneous national electricity markets liberalization and cross border regional integration of national electricity markets and the interplay between liberalization policy and reforms and the regulatory tools available to address their impact on provision of public services the author s proposed rethinking of the public services obligation offers new views on using this tool more effectively and proposes possibilities for its practical implementation through measures such as energy efficiency allocation of interconnectors capacity transparency addressing the affordability issue and the protection of vulnerable customers the book is remarkable for its clear analysis of the policy lessons arising from the export of the idea of liberalized energy markets and will be welcomed by practitioners officials academics and others in energy law and policy for its informative and forward looking overview of the national and cross border reforms in the energy community framework

this book examines the theories and practice of how to control corporate behaviour through legal techniques the principal

theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the usa public enforcement of competition law by the european commission and the recent reform of policies on public enforcement of regulatory law in the united kingdom noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various european regulatory structures where behavioural techniques can be seen or could be applied sectors examined include financial services civil aviation pharmaceuticals and workplace health safety key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance systems in which reporting is essential for safety only function with a no blame culture the book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles hence the book proposes a new theory of ethical regulation this title is included in bloomsbury professional s international arbitration online service

this important book outlines how despite varying levels of global socio economic development governments around the world can guarantee their citizens fundamental right to basic healthcare grounded in the philosophical position that healthcare is an essential element to human dignity the book moves beyond this theoretical principle to offer policy makers a basis for health policies based on public accountability and social responsiveness also emphasizing the importance of global co operation particularly in the area of health promotion and communication it addresses too the issue of financial sustainability suggesting robust mechanisms of economic and social regulation new opportunities created by e health evidence based data and artificial intelligence are all highlighted and discussed as is the issue of patient rights students and researchers across bioethics public health and medical sociology will find this book fascinating reading as will policy makers in the field

master s thesis from the year 2004 in the subject law media multimedia law copyright grade first distinction mit auszeic university of wales aberystwyth course ll m programm language english abstract this dissertation aims to assess the effectiveness and suitability of european regulation in respect to e commerce taking the european lisbon strategy as set out in 2000 as a starting point this paper examines whether europe is on the right track to becoming the most competitive and dynamic knowledge based economy by 2010 hereby the scope of this paper is limited to e commerce only as one essential

part of a knowledge based economy and an e ready europe after outlining the special nature of e commerce the rationale behind regulation and the historical background of european regulation in this field this paper concentrates on four issues where the eu has become active in regulating e commerce namely the essential prerequisite of an existing e infrastructure e signatures privacy and consumer protection the european approach to each of these issues is assessed to reveal its strengths and weaknesses moreover this european way of regulating e commerce is then compared with other regulative attempts hereby special attention is paid to the us approach to regulating e commerce which is mostly based on self regulation thus this paper comes to the conclusion that europe is on the right track to becoming e ready in respect to e commerce basic regulatory decisions have the potential to lead in the right direction although they do not always provide the most effective solution often european directives do not reach far enough and are outdated thus they do not address e commerce sufficiently give too much discretion to the member states and leave prevalent gaps or do not interoperate properly therefore the european regulation on e commerce needs some revision and has to take some brave and innovative steps to establish legal certainty as well as to create consumer trust and confidence following this path active participation can be promoted and consequently a vibrant e commerce market created
