begins with an in depth history of the tactical urbanism movement and its place among other social political and urban planning trends with a detailed set of case studies that demonstrate the breadth and scalability of tactical urbanism interventions this book provides a detailed toolkit for conceiving planning and carrying out projects

tactics like start small value intangibles and bundle pragmatics with delight can help libraries engage with their users while also solving immediate problems best of all these

projects can be lightweight inexpensive and quick to realize

temporary and tactical urbanism examines a key set of urban design strategies that have emerged in the twenty first century such projects range from guerrilla gardens and bike lanes to more formalised temporary beaches and swimming pools parklets pop up plazas and buildings and container towns these practices enable diverse forms of economic social and artistic life that are usually repressed by the fixities of urban form and its management this book takes a thematic approach to explore what the scope of this practice is and understand why it has risen to prominence how it works who is involved and what its implications are for the future of city design and planning it critically examines the material social economic and political complexities that surround and enable these small ephemeral urban interventions it identifies their short term and long term implications for urban intensity diversity creativity and adaptability the book s insights into temporary and tactical urbanism have particular relevance in the context of the covid 19 pandemic which has highlighted both the need and the possibility of quickly transforming urban spaces worldwide they also reveal significant lessons for the long term planning and design of buildings landscapes and cities

volume 2 is a survey of tactical urbanism projects mostly in the north american context the tactics include open streets play streets build a better block park ing day guerilla gardening pop up retail pavement to plazas pavement to parks pop up cafes depave chair bombing food carts trucks site pre vialization pop up town hall informal bike parking intersection repair ad busting reclaimed setbacks park mobile weed bombing mobile vendors micro mixing park making camps

in 2030 the world s population will be a staggering eight billion people of these two thirds will live in cities and most will be poor with limited resources this uneven growth will be one of the greatest challenges faced by societies across the globe over the next years city authorities urban planners and designers economists and many others will have to join forces to avoid major social and economical catastrophes working together to ensure these expanding megacities will remain habitable to engage this international debate the museum of modern art presents uneven growth tactical urbanisms for expanding megacities its third iteration in the issues in contemporary architecture series following the same model as the critically acclaimed rising currents projects for new york s

waterfront and foreclosed rehousing the american dream uneven growth brings together an international group of scholars practitioners and experts of architecture and urbanism in a series of workshops an exhibition and a publication to focus on how emergent forms of tactical urbanism can address the increasing inequality of urban development around the globe featuring proposals for six global metropolises new york mumbai rio de janeiro istanbul hong kong and lagos each developed by a team pairing local practitioners with international researchers uneven growth documents the brainstorming sessions and workshops interviews with each team and essays by leading scholars on the issue make the publication a rich resource for students and professionals alike and a catalyst for worldwide change

short term community based projects from pop up parks to open streets initiatives have become a powerful and adaptable new tool of urban activists planners and policy makers seeking to drive lasting improvements in their cities and beyond these quick often low cost and creative projects are the essence of the tactical urbanism movement whether creating vibrant plazas seemingly overnight or re imagining parking spaces as neighborhood gathering places they offer a way to gain public and government support for investing in permanent projects inspiring residents and civic leaders to experience and shape urban spaces in a new way tactical urbanism written by mike lydon and anthony garcia two founders of the movement promises to be the foundational guide for urban transformation the authors begin with an in depth history of the tactical urbanism movement and its place among other social political and urban planning trends and a detailed set of case studies demonstrate the breadth and scalability of tactical urbanism interventions finally the book provides a detailed toolkit for conceiving planning and carrying out projects including how to adapt them based on local needs and challenges tactical urbanism will inspire and empower a new generation of engaged citizens urban designers land use planners architects and policymakers to become key actors in the transformation of their communities

essays and photographic studies presented at los angeles forum for architecture and urban design

cities often become the key battlefields in modern warfare resulting of course in human casualty and also in the wholesale destruction of urban structures afterwards when

reconstruction commences it appears that the process follows strikingly similar patterns across the world using the examples of mostar in bosnia and herzegovina and kabul in afghanistan this volume asks is there a u n urbanism

who shapes our cities in an age of increasing urban pluralism globalization and immigration decreasing public budgets and an ongoing crisis of authority among designers and planners the urban environment is shaped by a number of non traditional stakeholders the book surveys the kaleidoscope of views on the agency of urbanism providing an overview of the various scholarly debates and territories that pertain to bottom up efforts such as everyday urbanism diy urbanism guerilla urbanism tactical urbanism and lean urbanism uniquely this books seeks connections between the various movements by curating a range of views on the past present and future of bottom up urbanism the contributors also connect the recent trend of bottom up efforts in the west with urban informality in the global south drawing parallels and finding contrast between social and institutional structures across the globe the book appeals to urbanists in the widest sense of the word those who shape study and improve our urban spaces

for the first time in the history of the architecture biennale the american pavilion earned special recognition in 2012 for spontaneous interventions the exhibition portrays an emerging phenomenon where citizen led movements address urban problems with small scale low cost interventions sometimes sanctioned sometimes not the concept behind this movement has become known as tactical urbanism this report examines the rise of tactical urbanism as an opportunity for the field of urban planning and describes how tactics can fit into the formal planning process currently there exists a lack of understanding and research on the concept this report contributes to the limited research by analyzing existing theory which discusses and supports the concept of tactical urbanism after providing a theoretical foundation four interventions displayed at the biennale are reviewed to demonstrate the potential of this emerging approach by evaluating the theoretical support behind tactical urbanism the lacunae in planning literature and the potential of this emerging approach as demonstrated by the four case studies this report attempts to legitimize the discussion on tactical urbanism and identify how this emerging approach can fit into the formal planning process

new frontiers for media architecture this compendium explores how digital media is

shaping cities today and in the years to come it illustrates groundbreaking use of light and media in urban environments through 36 winning or shortlisted entries from the media architecture biennale awards in 2014 and 2016 in five categories animated architecture money architecture participatory architecture urban interaction spatial media art future trends prototypes

beta or volume 1 is a survey of tactical urbanism projects mostly in the north american context the tactics include build a better block parking day play streets open streets pavement to plazas pop up shops pop up cafes chair bombing guerilla gardening street fairs food carts trucks mobile vendors

the theme of this volume is landscape urbanism with the agenda of linking emergent theories of landscape urbanism with its contemporary practice while a few recent symposiums and articles have addressed components of the subject the underlying theoretical trajectory of this emergent field has still not been codified in an accessible way the publication of volume 14 of center will fill this void with the inclusion of a reprint series of historically significant texts combined with original articles by noted authors and emerging practitioners

tactical urbanism projects particularly short term demonstration projects are an increasingly popular method of community participation as part of the planning process but have not been included as part of the urban planning and design literature the literature on community participation in urban planning and design does not explore tactical urbanism as a method and the literature on tactical urbanism has few studies that look at how government agencies are using it especially as a form of community

participation as part of the planning process how are government agencies using tactical urbanism demonstration projects for community participation as part of the planning process the literature on tactical urbanism shows that it can be an exclusive act limited to privileged individuals and or groups with the time and resources available similarly literature shows that traditional forms of community participation typically involve only a privileged few individuals can tactical urbanism demonstration projects facilitated by cities further more equitable and inclusive community participation how effective are tactical urbanism demonstration projects facilitated by government agencies in addressing problems of equity and exclusion engaged in the tactical urbanism literature these are questions i aim to answer through my research to advance the literature understanding and practice of both tactical urbanism and community participation my thesis focuses on tactical urbanism facilitated by government agencies specifically tactical urbanism projects focused on improving traffic safety that are utilized as part of the planning process for community participation i believe tactical urbanism demonstration projects have the potential to make community participation tactical urbanism and transportation planning more equitable and inclusive i will be analyzing a variety of case studies that explicitly use tactical urbanism as a method of community participation particularly focusing on projects that involve diverse historically marginalized populations i hope my research can further the understanding and practice of tactical urbanism used as community participation by government agencies particularly to advance planning for safer streets

with the aim of projecting alternative and sustainable forms of urbanism the book asks what are the key principles of an ecological urbanism how might they be organized and what role might design and planning play in the process while climate change sustainable architecture and green technologies have become increasingly topical issues surrounding the sustainability of the city are much less developed the premise of the book is that an ecological approach is urgently needed both as a remedial device for the contemporary city and an organizing principle for new cities ecological urbanism approaches the city without any one set of instruments and with a worldview that is fluid in scale and disciplinary approach design provides the synthetic key to connect ecology with an urbanism that is not in contradiction with its environment the book brings together design practitioners and theorists economists engineers artists policy makers

environmental scientists and public health specialists with the goal of reaching a more robust understanding of ecological urbanism and what it might be in the future contributors include homi bhabha stefano boeri chuck hoberman rem koolhaas sanford kwinter bruno latour nina marie lister moshen mostafavi matthias schuler sissel tolaas charles waldheim
