diversity and rights in care is unique in taking a narrative approach to diversity identity and human rights and in applying this to professional practice in social care diversity and rights offers

human rights are by definition universal yet in a world characterized by enormous diversity there is no consensus about the implications of the universality of human rights in several regions of the world human rights conceptions are promoted that challenge the mainstream largely western dominated discourse on this subject this volume offers an analysis of context specific human rights discourses from east asia subsaharan africa and the muslim world rather than interpreting these as threats to universality the author examines how and to what extent the claims that are advanced can and should be accommodated in order to further the universality of human rights a theory of inclusive universality is developed and its implications are translated into legal techniques on the one hand there are flexibility techniques allowing for contextual diversity in the interpretation and application of human rights norms on the other hand giving credit to non western views also implies that there should be room for transformation of those human rights norms

in matters such as affirmative action or home schooling rights of ethnic and other minority groups often come into conflict with those of society in a culturally diverse population such as ours but before considering the dilemmas posed by these issues we must first ask such basic but important questions as what group rights are and how they intersect with the principles of democracy this new collection brings together some of today's leading thinkers from the cutting edge of these debates taking in a broad range of issues confronting philosophers sociologists and political scientists contributors such as carl wellman carol gould and rex martin examine the nature of groups and the conflict between group rights and democracy and also consider case studies depicting current issues in cultural ethnic and religious rights the first section on the nature of groups examines some of the perplexing alternatives in the formulation of a theory of group rights these articles investigate the kinds of rights minorities might claim and ask when groups can be held responsible for the acts of some of their members the second section addresses the treatment of groups in a democracy and the precarious balance between indifference toward minorities and capitulation to their demands here the contributors examine five principles for the sensitive treatment of minority

and disadvantaged groups in a democratic society a final section explores specific conflicts between subgroup and societal claims through case studies dealing with affirmative action religious practice and the education of children and the land rights of indigenous peoples by drawing on the legal and political dilemmas related to these cases the authors confront issues of core versus peripheral interests of individual member versus subgroup rights and of the possibilities for social openness raised in the preceding sections written from varied perspectives groups and group rights offers stimulating reading for both students and professionals as it takes on some of the most pressing dilemmas confronting our society

the democratic management of cultural diversity is the greatest political challenge for present day european societies the plural character of our societies forces us to rethink the basic political concepts starting off from a new idea of inclusive and plural d emocracy the application of human rights must be reconsidered in the light of presentday reality so that democratic states are able to guarantee the benefit of these rights to all persons through their identity and not in spite of it thus creating political spaces that are open to a multi identity coexistence
