this is a sample chapter from basel ii implementation an invaluable guide that puts a potent combination of theory and real world practice at your fingertips written by two of the most globally recognized and sought after thought leaders in basel ii implementation this how to book maps out step by step implementable solutions that are both academically credible and practical making them defendable to regulators and executable within the constraints of data resources and time

a prototype device the kansas water cement ratio meter has been developed that can measure the water cement ratio of a plastic concrete mix the method was based on the measurement of the turbidity of the water cement slurry separated out of a concrete mixture by pressure sieving this study was undertaken to improve the meter and to do a sensitivity analysis

this book combines an overview of validity theory trends in validation practices and a review of standards and guidelines in several international jurisdictions with research synthesis of the validity evidence in different research areas an overview of theory is both useful and timely in view of the increased use of tests and measures for decision making ranking and policy purposes in large scale testing assessment and social indicators and quality of life research research synthesis is needed to help us assemble critically appraise and integrate the overwhelming volume of research on validity in different contexts rather than examining whether any given measure is valid the focus is on a critical appraisal of the kinds of validity evidence reported in the published research literature the five sources of validity evidence discussed are content related response processes internal structure associations with other variables and consequences the 15 syntheses included here represent a broad sampling of psychosocial health medical and educational research settings giving us an extensive evidential basis to build upon earlier studies the book concludes with a meta synthesis of the 15 syntheses and a discussion of the current thinking of validation practices by leading experts in the field
