accounting standards us and international have been updated to reflect the latest pronouncements an increased international focus with more coverage of iasc and non us gaaps and more non us examples

financial reporting practices differ widely between countries and this has far reaching implications for multinational businesses over more than a century there have been attempts to classify countries into groups by similarities of practices with the recent spread of international financial reporting standards it might appear that classification is largely of historical interest but this is not the case for several reasons explained in this book christopher nobes offers a critical analysis of the many previous accounting classifications having drawn lessons from other fields of science and social science revised and updated to reflect the ifrs era the book discusses how old classifications are reflected in today s international differences in practice under ifrs it concludes with a

discussion on the most useful classifications and how classifications can still be relevant in the era of international standards this book will be essential for academics postgraduates and undergraduates in international accounting accounting theory and to international accounting professionals

international financial reporting standards ifrs are now mandatory in many parts of the world including europe australia and china in addition many countries are in the process of ifrs adoption lastly foreign registrants in us companies no longer have to undertake a costly us ifrs reconciliation therefore it is clear that investors analysts and valuers need to understand financial statements produced under ifrs to feed in to their valuations and broader investment decisions written by practitioners for practitioners the book addresses valuation from the viewpoint of the analyst the investor and the corporate acquirer it starts with valuation theory what is to be discounted and at what discount rate it explains the connection between standard methodologies based on free cash flow and on return on capital and it emphasizes that whichever method is used accurate interpretation of accounting information is critical to the production of sensible valuations the authors argue that forecasts of cash flows imply views on profits and balance sheets and that non cash items contain useful information about future cash flows so profits matter the book then addresses the implications for analysis and valuation of key aspects of ifrs including pensions stock options derivatives provisions leases the text also sets out which countries use gaap as well as the key differences between ifrs and us gaap treatments of these issues in addition to their implications for analysis a detailed case study is used to provide a step by step valuation of an industrial company using both free cash flow and economic profit methodologies the authors then address a range of common valuation problems including cyclical or immature companies as well as the specialist accounting and modelling knowledge required for regulated utilities resource extraction companies banks insurance and real estate companies accounting for mergers and disposals is first explained and then illustrated with a detailed potential acquisition using real companies

in its us edition accounting principles has been a market leading introductory accounting textbook for over 25 years the australasian adaptation of this highly regarded textbook accentuates its relevance to both students and academics alike with its constructive pedagogical structure application of accounting to a wider business environment and clear easy to understand writing style as accounting is the language of business principles of financial accounting 3rd edition will teach students the value of accounting information in business and its integral role in business planning and growth the third edition thoroughly details the steps in the accounting cycle and the accounting process from recording business transactions through to preparing financial statements and the reporting requirements under ifrs throughout the chapters real company financial information and extracts from annual reports are used to reinforce how accounting

information is presented and the range of business decisions that can be made from accounting information the text is ideal for a first course in financial accounting and students studying with this textbook will be equipped with the knowledge and skills required to further their accounting studies

market desc accountants financial analysts special features this book contains updated and latest pronouncements of accounting standards both us and international about the book this text is an expert guide to interpreting financial statements and information that helps readers in the competitive edge they need this book shows how to accurately evaluate a firm s financial status and make informed investment decisions it features a comparative analysis of us and international reporting requirements and the latest methods of financial research
