christian apologist ben smith believes that the creation account in genesis 1 can be read literally and historically as a real week of seven normal days without contradicting modern astronomy and geology regarding the age of the universe and earth many christians are divided over how to reconcile genesis with modern science and this book evaluates all of the major options ultimately concluding that the bible allows for an old universe and earth in a way that is also scientifically accurate a former young earth creationist smith now believes that the age of creation is not specified in the bible and therefore scientists are free to answer the question he believes that christians should not hide from the controversy over the age of the earth but should take a fresh look at the text and be impressed with its accuracy

original sin and the evolution of sexual difference re examines christian thinking about original sin and sexual difference in conversation with recent developments in evolutionary biology and feminist philosophy and theology

this title was first published in 2002 the premise of the text is that there is a continuing need for biblical hermeneutic proposals and frameworks which emerge from the fields of both feminism and christian theology feminism the author asserts demands not only the plotting of new routes but the restructuring of entire landscapes as such this project since it seeks to develop a feminist theological frame for meaning impinges on and is impacted by innumerable inter relating questions in consequence the scope of the book is necessarily both broad and interdisciplinary the author j annine jobling uses particular texts and has articulated her own positions in response in this way the embodied practice of thinking in relation is mirrored in the texts produced this has determined the macro structure of the thesis which is based on an analysis of two feminist biblical scholars elisabeth schussler fiorenza and phyllis trible from this analysis jobling identifies two primary principles for interpretation remembrance and destabilization this is a strategy which allows both materialist and post structuralist perspectives to be set into play each of which has vital contributions to make to feminist enterprises the bible is

understood as matrix as a set of discourses which are permeable to and intersect with other cultural discourses the task of feminist interpretation is then to reconstitute the heterogenous biblical matrix in feminist horizons a fundamental tenet of the book is that hermeneutics inhabits particular metaphysical constructs therefore the argument extends from an interpretation of the bible to an epistemological framework in which an eschatological hereneutic is recommended to a metaphysical framework which takes eschatology as its structuring principle the author argues that it is eschatology which can provide the resources for an ontological model radically disruptive of a metaphysics of presence and in which it is possible to discern the traces of god from this outermost limit of the author's hermeneutic investigations the text returns to the centre the feminist discursive community and develops a construct that the ekklesia as a feminist deliberative space set oppositionally to structures worldviews and ideologies operates on patriarchal logics the relationship of this imagined community is compared to the christian church and scripture ethics and gendered identity within a logic of equity

frieden explores methods of dream interpretation in the bible the talmud and in the writings of sigmund freud and brings to light freud's troubled relationship to his judaic forerunners this book reveals unfamiliar associations in intellectual history and challenges received ideas in biblical talmudic and freudian scholarship freud distanced himself from dream interpreters such as joseph and daniel by rejecting their intuitive methods and their claims to predict the future while biblical and talmudic dream interpretation generally involve prophecy freud sought to limit himself to the determination of prior causes in the dreamer's life nevertheless friedien demonstrates that freud's strategies of interpretation and especially his use of free association inevitably guide the dreamer toward a future this resonance between ancient prophecy and modern psychology is merely one example of the concealed relationship between judaic and psychoanalytic dream interpretation friedien shows the role both of actual influences and influences denied by freud

within the biblical community the creation versus creation debate has become an acute problem currently four main ideas attempt to explain the genesis creation story young earth creation theology gap theology day age theology and literary interpretations each idea has its strong points countered by major objections the age of the earth has emerged as a major issue calculated to have been created in 4004 bc by anglican archbishop james ussher any suitable solution to the genesis problem must respect the integrity of the bible yet accept the evidence of science in regard to time a task accomplished in a no holds barred search for truth addressing the following a credible translation of genesis chapters 1 and 2 that corrects over 2200 years of error how solid scientific evidence in support of time easily harmonizes with an accurate translation genesis chapters 1 and 2 are not two conflicting creation accounts but rather two complementary narratives an ancient document accepted by most biblical scholars that has hindered a proper explanation of the genesis story ten key verbs incorrectly explained which control traditional interpretations of the seven day creation chronicle jacket
