since the dawn of mankind observers of the sky have wondered at the sudden appearance of new stars on the seemingly unchanging heavens and for at least 2000 years have recorded these phenomena in their annals and archives even in

more modern times since the discovery of sn1885a in s andromeda which gured in the important island universe discussions of the 1920 s the puzzle of supernovae sne has played an important role in astrophysics only with the seminal work of fritz zwicky and walter baade in the 1930 s did we begin to understand the di erences between novae and sne and the importance of sne as the fonts of energy for the interstellar medium and as drivers of chemical evolution in galaxies as recently as the 1940 s and 1950 s the early days of radio astronomy were heavily in uenced by the familiar names of cassiopeia a and taurus a two young supernova remnants and two nobel prizes have been awarded for discovery and study of a related phenomenon pulsars in spite of the great age of the study of sne since at least the chinese records of sn185and probably earlier the eld is in fact very young having only attracted a large devoted following since the spectacular type ii sn1987a in the large magellanic cloud the rst naked eye sn in more than 400 years

this book reviews the state of the art in algorithmic approaches addressing the practical challenges that arise with hyperspectral image analysis tasks with a focus on emerging trends in machine learning and image processing understanding it presents advances in deep learning multiple instance learning sparse representation based learning low dimensional manifold models anomalous change detection target recognition sensor fusion and super resolution for robust multispectral and hyperspectral image understanding it presents research from leading international experts who have made foundational contributions in these areas the book covers a diverse array of applications of multispectral hyperspectral imagery in the context of these algorithms including remote sensing face recognition and biomedicine this book would be particularly beneficial to graduate students and researchers who are taking advanced courses in or are working in the areas of image analysis machine learning and remote sensing with multi channel optical imagery researchers and professionals in academia and industry working in areas such as electrical engineering civil and

environmental engineering geosciences and biomedical image processing who work with multi channel optical data will find this book useful
