j l moreno wrote books chapters and articles about psychodrama his writing like the method he pioneered is rich and complex many students practitioners and participants around the world have encountered moreno s work in action however fewer people may have had the opportunity to read and think about the words of the father due to the limited availability of key texts a desire to ensure moreno s work is available to the widest possible audience inspired members of the north west psychodrama association to

work together to re publish the books in this series we hope by doing so j l moreno s words will continue to reverberate across time and space inspiring new generations of practitioners to be as creative and spontaneous as is possible whilst managing the complexity of modern day practice

j l moreno writes being a genius does not consist only of having ideas this is essential but is a far later phase of genius being a genius starts with a feeling of being in contact with the whole universe a feeling of totality being fed by it free of charge and feeding it gratefully in return in this book the presentation of his life vision and life s work moreno gives countless portals for the opening of contact with the whole universe to a feeling of totality this totality is what motivated him and has also motivated the editor for much of his life the direct felt experience of this totality is at the center of religious existential and spiritual traditions and in this book we have an uncloaked method for the same enlightenment process the totality and wholeness of life can be found in the enactment of moreno s method what can be greater than to really live this and to give it to others
