in this book i pursue three goals the first is to describe what has been learned about human freedom through psychological research the second is to provide a conceptual and methodological critique of the large body of that research which has been conducted within the framework of a positivist natural science experimental social psychology my third goal is to offer a contrasting human science approach to the study of human freedom and to illustrate its use in empirical study for more than twenty years psychologists have investigated the conditions under which people are seen to be free the conditions under which they report feeling free the psychological consequences of interference with behaviour

freedoms and to a lesser extent how it feels to feel free empirical findings on each of these facets of human freedom have arisen in quite separate research traditions and they are brought together here for the first time during the same twenty years a general critique of the dominant positivist natural science approach to complex human phenomena has been growing although it has escalated recently this critique has firm roots that go back to the turn of the century i review this general critique and apply it specifically to the study of human freedom surely a complex human phenomenon more complex ambiguous and paradoxical than most of us imagine

between 1975 and 1997 some three million vietnamese cambodians and laotians fled atrocities in their home countries with over 210 000 resettling in canada while this history is partly known to some canadians little has been written about it especially from the perspectives of the refugees themselves hearts of freedom is a rich oral history based on interviews with 145 former refugees sharing deeply moving accounts of oppression concentration camps genocide and perilous escapes over land and sea survivors reflect on their first impressions of canada the unfamiliar snow and cold the unexpected kindness of neighbours and occasional encounters with racism through their experiences we come to understand the strengths and weaknesses of canada's refugee programs these stories reveal how refugees attachment to canada grew over the years and how multiculturalism policies facilitated that ordinary canadians played a decisive role in the first mass refugee movement through newly created private sponsorship programs a role for which the united nations awarded the nansen medal to the canadian people in 1986 coming at a time when we are assessing the benefits of immigration and refugee policies and programs hearts of freedom documents the lives and contributions of people who have suffered the worst excesses of war to rebuild their lives in canada

aung san suu kyι spoke passionately about non violence she wrote involved articles about compatibility of democracy with buddhism and she won the hearts and minds of so many with her call for the freedom from fear it seemed for more than two decades that suu kyι was a perfect non western propagator of democracy human rights rule of law yet a deeper analysis reveals that suu kyι intellectually indeed has been a democrat all along but a burmese democrat suu kyι understands democracy in a buddhist way and she reasons about politics using buddhist ideas idioms and concepts this buddhist dominance of her political thought had several consequences the most important one being that her approach to

politics has first and foremost been a moral one her vision of democracy and of politics in general is a moral vision it is something i propose to call the moral democracy the same reason that made her famous and admired worldwide now contributed to her fall from grace for too many outside burma myanmar it is impossible to understand how suu kyi yesterday s global personification of good and morality can now silently endorse crimes against humanity conducted in her country and accept forced relocation of 700 thousand people a cynic would quote bertrand russell s words we have two kinds of morality side by side one which we preach but do not practice and another which we practice but seldom preach and add a commentary that it applies especially to politicians one however may offer a more favourable explanation that suu kyi represents a tragic clash of ideas including moral ideas with political reality whatever the case it was morality that made her famous it was the same moralistic attitude that contributed to her removal from international olympus and it is this moral understanding of politics that is the hallmark of her political thought which is here to stay for longer as political ideas last longer than changing political circumstances and fashions from the preface the dramatic fall from grace of burma s human rights icon aung san suu kyi shocked the world micha  lubina s magisterial account of aung san suu kyi s political education demystifies the behavior in power of this otherwise enigmatic leader this is the indispensable book for anyone who wants to understand the mind of one of the world s most controversial women prof salvatore babones university of sydney dr micha  lubina known in poland for portraying aung san suu kyi not as a human rights activist but as a realist politician in the very footsteps of her father now comes out with his research to the international audience following the example of mahbubani s can asian think lubina shows the intellectual and philosophical tradition of myanmar through the case study of suu kyi s political thought it s a unique undertaking that presents suu kyi from an unexpected angle as a theoretician and political thinker or sage both the scope of research done and the material presented are very impressive and rather unique even on international scene prof bogdan oralczyk university of warsaw former ambassador to myanmar this book is a well documented and well constructed multilayered complex analytical work based on very rich research interviews with suu kyi and personal observations of the author who displays unquestioned analytical skills as such the book represents a pioneer work in burmese studies prof agnieszka kuszewska jagiellonian university in cracow none of the numerous books and articles that i have read about daw aung san suu kyi dissects her political thoughts and background as thoroughly as the book written by dr micha  lubina he shows the political construction of her

character her struggle her idealism her sources of inspiration and her weaknesses it is a necessary publication to read in order to understand historical and contemporary policymaking in today s burma dr marion sabrié university of rouen normandy

this book contributes to a feminist understanding of international human rights by examining restrictions on reproductive freedom through the lens of the right to be free from torture and other cruel inhuman or degrading treatment ronli sifris challenges the view that torture only takes place within the traditional paradigm of interrogation punishment or intimidation of a detainee arguing that this traditional construction of the concept of torture prioritises the experiences of men over the experiences of women given that the pain and suffering from which women disproportionately suffer frequently occurs outside of this context she does this by conceptualising restrictions on women s reproductive freedom within the framework of the right to be free from torture the book considers the gendered nature of international law and the gender dimensions of the right to be free from torture it examines the extension of the prohibition of torture to encompass situations beyond the traditional detainee context in recent years to encompass situations such as rape and female genital mutilation it goes on to explore in detail whether denying access to abortion and involuntary sterilization constitutes torture or other cruel inhuman or degrading treatment under international law the book looks at whether limitations on reproductive freedom meet the determining criteria of torture which are severe pain or suffering being intentionally inflicted being based on discrimination linked in some way to a state official whether they constitute lawful sanctions and the importance of the concept of powerlessness in doing so the book also highlights how this right may be applicable to other gender based abuses including female genital mutilation and how this right may be universally applied to allow women worldwide the right to reproductive freedom

the book brings to light the views of different scholars and thinkers both indian and foreign for a proper evaluation of the concept of freedom it aims at evaluating the problems and prospects of human life in the context of expanding its different creative states of freedom the study is in four parts part i expounds the revolutionary outlook of 3 great thinkers marx bose and gandhi part ii expresses freedom in the development of different domains of existence part iii shows freedom as intercultural awakening part iv deals with

freedom as an expression of global consciousness condition good
