governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport related carbon dioxide co2 and air pollutant emissions however battery electric vehicles bevs and plug in hybrid electric vehicles phevs have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges which still hampers the market potential of these

vehicles despite persisting shortfalls mechanisms such as technological learning and economics of scale promise to improve the techno economic performance of bevs and phevs in the short to mid term here the author seeks to obtain insight into the techno economic prospects of bevs and phevs by i establishing experience curves and ii quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time series analysis the analysis captures the situation in germany between 2010 and 2016

finally available a high quality book of the original classic edition of the soul of golf it was previously published by other bona fide publishers and is now after many years back in print this is a new and freshly published edition of this culturally important work by percy adolphus vaile which is now at last again available to you get the pdf and epub now as well included in your purchase you have the soul of golf in epub and pdf format to read on any tablet ereader desktop laptop or smartphone simultaneous get it now enjoy this classic work today these selected paragraphs distill the contents and give you a quick look inside the soul of golf look inside the book it is such a fundamental and silly error but nevertheless an error which is made by the greatest players in the world in their published works that i shall not at the present moment deal with the matter but shall refer to it again in my chapter on the distribution of weight for this matter of the distribution of weight which is of absolute root importance in the game of golf has been most persistently mistaught by those whose duty it is to teach the game as they play it so that others may not be hampered in their efforts to become expert by following false advice of course they begin to turn over much sooner than this but the truth is that the turn over of the wrist or more correctly speaking the roll of the forearms in the downward swing is such a wonderfully gradual and natural process that it would be utterly impossible for anyone to say at what particular period in the downward swing it happens and if anyone can say or rather does say at what particular period the wrists come in to the downward stroke he is not only an ignorant golfer but an enemy to golf for it is a matter which cannot be described except to say that the wrist action begins absolutely with the beginning of the stroke and is then a continuous and natural turn until the club gets very close to the ball by which time there is practically nothing left for the wrists to do as the club has reverted to the position in which it was at the moment of address or perhaps i should say that it ought to have reverted to that position as indeed in so far as regards the club itself is properly shown by james braid in his photographs of stance and address and impact

the story of the golf with a difference the emphasis is on the hotter hatch without ignoring the range that made an acknowledged market leader
