the twentieth century witnessed an unprecedented increase in the number of capital cities worldwide in 1900 there were only about forty but by 2000 there were more than two hundred and this surely is reason enough for a book devoted to the planning and development of capital cities in the twentieth century however the focus here is not only on recently created capitals indeed the case studies which make up the core of the book show that while very different the development of london or rome presents as great a challenge to planners and politicians as the design and building of brasília or chandigarh put simply this book sets out to explore what makes capital cities different from other cities why their planning is unique and why there is such variety from one city to another sir peter hall s seven types of capital city and lawrence vale s the urban design of twentieth century capital cities provide the setting for the fifteen case studies which follow paris moscow and st petersburg helsinki london tokyo washington canberra ottawa hull brasília new delhi berlin rome chandigarh brussels new york to bring the book to a close peter hall looks to the future of capital cities in the twenty first century for anyone with an interest in urban planning and design architectural planning and urban history urban geography or simply capital cities and why they are what they are planning twentieth century capital cities will be the key source book for a long time to come

an overview of modern art theory and history this anthology treats modern art as a complex cultural political and social process intimately connected with larger cultural political and social contexts pearson

the utopian visions of three of urban planning s greatest visionaries ebenezer howard frank lloyd wright and le corbusier hated the cities of their time with an overwhelming passion the metropolis was the counter image of their ideal cities the hell that inspired their heavens in this book robert fishman examines the utopian visions of three of urban planning s greatest visionaries howard created the concept of the garden city where shops and cottages formed the center of a geometric pattern with farmland surrounding wright conceived of broadacre city the ultimate suburb where the automobile was king and le corbusier imagined ville radieuse the city of cruciform skyscrapers set down in open parkland

a comprehensive history of urban design in the 20th century our time is an urban age more people live in cities than ever before cities are growing larger and denser than ever and urbanity has reached unprecedented levels of complexity this boom in urbanization began in earnest around the turn of the twentieth century when technological advancement and the extraction of seemingly endless supplies of natural resources propelled urban development as urban populations steadily increased architects and planners were not only faced with designing housing and public space but also with responding to emerging societal challenges such as political tensions reconstruction decolonization economic crises growing climatic concerns and cultural shifts through the analysis of more than one hundred richly illustrated urban design projects and initiatives this book provides a comprehensive history of how these challenges have fomented new attitudes and approaches in the discipline of urban design

in the writing of urban design history of the twentieth century functionalist and avant garde models of the dissolution of the city are dominating in contrast this book presents projects whose goal is the ideal of a dense and urbane city drawing on plans built examples and theories of dense and urban cities and city districts in the twentieth century modern examples of urban design are analyzed and highlighted which until now have been evaluated more as fringe phenomena these include examples characterized by functional mixture social openness spatially defined public spaces urbanarchitecture historical reference and a cultural understanding of the city the book s new evaluation of modern urban design history creates opportunities for current planning by offering bestpractice models which better reflect the striving for urbanity and density

cities of tomorrow is a critical history of planning in theory and practice in the twentieth century as well as of the social and economic problems and opportunities that gave rise to it a critical history of planning in theory and practice in the twentieth century as well as of the social and economic problems and opportunities that gave rise to it trenchant perceptive global in coverage this book is an unrivalled account of its crucial subject comprehensively revised to take account of abundant new literature published since its original appearance and to view the 1990s in historical perspective reviews the development of the modern planning movement over the entire span of the twentieth century

the history of post second world war reconstruction has recently become an important field of research around the world alternative visions of post war reconstruction is a provocative work that questions the orthodoxies of twentieth century design history this book provides a key critical statement on mid twentieth century urban design and city planning focused principally upon the period between the start of the second world war to the mid sixties the various figures and currents covered here represent a largely overlooked field within the history of 20th century urbanism in this period while certain modernist practices assumed an institutional role for post war reconstruction and flourished into the mainstream such practices also faced opposition and criticism leading to the production of alternative visions and strategies spanning from a historically informed modernism to the increasing presence of urban conservation the contributors examine these alternative approaches to the city and its architecture

visions of the city is a dramatic history of utopian urbanism in the twentieth century it explores radical demands for new spaces and ways of living and considers their effects on planning architecture and struggles to shape urban landscapes the author critically examines influential utopian approaches to urbanism in western europe associated with such figures as ebenezer howard and le corbusier uncovering the political interests desires and anxieties that lay behind their ideal cities he also investigates avant garde perspectives from the time that challenged these conceptions of cities especially from within surrealism at the heart of this richly illustrated book is an encounter with the explosive ideas of the situationists tracing the subversive practices of this avant garde group and its associates from their explorations of paris during the 1950s to their alternative visions based on nomadic life and play david pinder convincingly explains the significance of their revolutionary attempts to transform urban spaces and everyday life he addresses in particular constant s new babylon finding within his proposals a still powerful provocation to imagine cities otherwise the book not only recovers vital moments from past hopes and dreams of modern urbanism it also contests current claims about the end of utopia arguing that reconsidering earlier projects can play a critical role in developing utopian perspectives today through the study of utopian visions it aims to rekindle elements of utopianism itself a superb critical exploration of the underside of utopian thought over the last hundred years and its continuing relevance in the here and now for thinking about possible urban worlds the treatment of the situationists and their milieu is a revelation david harvey distinguished professor of anthropology city university of new york graduate school

urban design architecture is a richly illustrated journey in the architectural events of the 20th century at the same time it offers an exciting documentation of the interrelation of people time and architecture

arguing that planning in practice is far more complicated than historians usually depict the authors examine closely the everyday social political economic ideological bureaucratic and environmental contexts in which planning has occurred in so doing they redefine the nature of planning practice expanding the range of actors and actions that we understand to have shaped urban development

what have been the general ideas about the growth of barcelona over the last fifty years why were they so controversial why is the metro still the cinderella of the metropolitan system who extended the cerdà plan to the river besides the answer to these questions and many more can be found in this book which explains a century of urbanism in barcelona stressing two key periods the years in which barcelona was conceived as a capital city and the years in which it was converted into a metropolis the book closes by raising current topics that have dominated discussion about the city from the turn of the 20th century and which are crucial to its future the architect and university lecturer josep parcerisa offers us the keys to understanding the city and its recent history throughout the book the reader will find more 300 images that often speak for themselves for the first time the urbanism of the city is explained and can be visualised at the same time

this text describes the creation of garden suburbs particularly by private enterprise in england during the 1920s and 1930s and how they have changed over time in response to social economic and cultural change
