1400 questions and a test simulating the delivery of unmatched preparation for the radiography certification recertification exam. 4 star review: this is an excellent resource for radiography student interns to use to prepare for the national registry. It poses a series of questions from each integral portion of radiography and covers all the units thoroughly. This is a wonderful resource for students to use to fully prepare for the exam. This is the best book around to prepare interns for the exam. Doody's review service: Lange's radiography examination, 8th edition, provides radiography students and recertifying radiographers with more than 1,400 registry-style questions with detailed answer explanations. Questions are organized by topic area for focused study, and the book also includes two comprehensive practice exams. This new eighth edition includes the ARRT examination content to be implemented in January 2012. Also new is coverage of computed tomography (CT) technology within the chapters on radiation protection, equipment procedures, and CT imaging. Also included is an exam simulating CD containing two complete practice exams. Features include patient care, radiographic procedures, radiation protection, image production and evaluation, and equipment operation and maintenance. Written by an author with more than 35 years teaching experience, each question includes detailed explanation of correct and incorrect answer options. Companion CD features one complete practice exam.

This book is the first edited compilation of selected refereed papers submitted to ERTEP 2007. The selected papers either dealt with technologies or scientific work and policy findings that address specific environmental problems affecting humanity in general but more specifically people and ecosystems in developing countries. It was not necessary for the work to have been done in a developing country but the findings and results must be appropriate or applicable to a developing country setting. It is acknowledged that environmental research, technology applications, and policy implementation have been demonstrated to improve environmental sustainability and protection in several developed economies. The main argument of the book is that similar gains can be achieved in developing economies and

economies in transition the book is organized into six chapters along some of the key themes discussed at the conference environmental health management sustainable energy and fuel water treatment purification and protection mining and environment soil stabilization and environmental monitoring it is hoped that the contents of the book will provide an insight into some of the environmental and health management challenges confronting the developing world and the steps being taken to address them
