describes the history development and current threat of various types of chemical biological and nuclear weapons as well as possible preventive measures in direct contrast to the popular phrase no weapons of mass destruction have been found this text presented overwhelming evidence that weapons of mass destruction wmd have been found in iraq chemical weapons a biological warfare program and key components of a nuclear weapons program were

discovered by coalition forces as a result of operation iraqi freedom both mustard and nerve agents were used against u s troops in iraq in 2003 over 50 chemical munitions have been captured in iraq since the 2003 invasion in addition to the captured chemical munitions that could kill over 100 000 people cyanide blocks and active cyanide production labs have been found in iraq as a result of operation iraqi freedom coalition forces discovered biological weapons feed stock in the home of a prominent iraqi bw scientist to include the most toxic substance known to man the feedstock when combined with growth media could be used to produce massive quantities of biological agents within weeks an active production line for bacillus subtilis was discovered in 2003 that iraqi scientists confirmed could be converted to an anthrax production line in less than a week in addition to the declared dual use facilities that could be quickly converted to make biological weapons coalition forces found numerous undeclared biological labs in the baghdad area as well as mobile labs some of which were buried with expensive equipment and documents on how to make anthrax inside in spite of un sanctions and inspections iraq managed to preserve key components of its nuclear program to include maintaining stockpiles of undeclared enriched uranium maintaining uranium enrichment technology and continuing research to develop a nuclear weapon nuclear material to include yellowcake and enriched uranium were found in iraq after the 2003 invasion as a result of operation iraqi freedom centrifuge parts and an ion implantation program to preserve emis technology both of which are used to enrich uranium were discovered in iraq this book will allow you to review the details of the types and quantities of weapons of mass destruction found in iraq as a result of operation iraqi freedom it includes pictures of u s troops capturing nuclear biological and chemical weapons in iraq in 2003 and 2004 and details the weapons found to date

the events of september 11 2001 have altered the course of arms control intended to eliminate weapons of mass destruction wmd and has made the role of international organizations controversial whether they can effectively verify compliance with the wmd treaty regime has now been questioned by the united states in responding to this basic question eliminating weapons of mass destruction examines how existing organizations apply the main verification tools how they can improve and consolidate them where possible in order to meet the new security challenges more effectively

the twenty nine articles explore the issue of wmd and key questions raised about terrorism its definition objects motivation whether there is a different species of it emerging in the aftermath of the close of the cold war preparedness and the means of prevention the conventional low technology terrorism of the past has exercised a social and political impact far out of proportion with the casualties it has caused the massive indiscriminate destruction caused by an act of wmd terrorism similarly would have disproportionate social political economic and strategic effects

presents a guide to the issues of weapons of mass destruction including definitions primary sources case studies research tools organizations and notable persons

the proliferation of weapons of mass destruction has continued to give cause for concern even after the end of the cold war this book analyses how the prospects for proliferation have changed since the 1990s particularly in light of the gulf war and the un inspections of iraq it will examine the new pattern of incentives and disincentives for proliferation the utility of these weapons at state and sub state levels and their implications for arms control and international security

first published in 2005 how should the problem of order associated with weapons of mass destruction be understood and addressed today have the problem and its solution been misconceived and misrepresented as manifested by the problematic aftermath of iraq war has 9 11 rendered redundant past international ordering strategies or these still discarded at our own peril these are questions explored in this adelphi paper

proliferation of wmd technologies is by no means a new concern for the international community indeed since the signing of the nuclear non proliferation treaty in 1968 tremendous energies have been expended upon diplomatic efforts to create a web of treaties and international organisations regulating the production and stockpiling of wmd sensitive materials within states as well as their spread through the increasingly globalised channels of international trade to other states and non state actors however the intervention in 2003 by western powers in iraq has served as an illustration of the importance of greater understanding of and attention to this area of law as disagreements over its content and application have once again lead to a potentially destabilising armed intervention by members of the united nations into the sovereign territory of another member state other ongoing disputes between states regarding the character of obligations assumed under non proliferation treaty instruments and the effect of international organisations decisions in this area form some of the most contentious and potentially destabilising issues of foreign policy concern for many states this book provides a comprehensive analysis of international law and organisations in the area of wmd proliferation it will serve both as a reference for understanding the law as it currently exists in its political and economic context as well as an analysis of areas in which amendments to existing law and organisations are needed

this book examines the use of concepts specifically weapons of mass destruction wmd in us foreign policy discourse current analysis of wmd definition

has made headway into identifying the repercussions that the conceptual conflation of such diverse weapons typically understood as a reference to nuclear biological and chemical weapons has for international security while the concept assumes these weapons are equal the vast disparity between them and their disparity from the conventional weapons from which they are supposedly distinct means this approach is seen as unreflective of reality causing miscalculations in security policy not least this has highlighted that the issue of wmd definition is a priority concern where this has direct implications for strategy in contrast weapons of mass destruction and us foreign policy argues that this approach does not accurately portray conceptual meaning particularly where it overlooks how political language is constructed in demonstrating this the book presents a conceptual history of wmd detailing how this has been defined and used since its emergence into political discourse c 1945 specifically it argues that definition is an inherently strategic act policymakers have deliberately included or excluded certain weapons and threats from the classification in order to shape foreign policy dialogues as such understanding the wmd concept is not a search for a single interpretation but an analysis that seeks to comprehend what the concept means at any given time especially where this relates to the political circumstances of its use by identifying a variety of ways in which wmd has been defined the book constructs a dynamic view of conceptual meaning that recognises and more importantly explains the inherent diversity in interpretation as the consequence of epistemic and institutional context and the strategic response of policymakers this book will be of much interest to students of weapons of mass destruction us foreign and security policy security studies political narratives and ir
