this practical book integrates the subject of industrial chemistry with pollution control and environmental chemistry with this unified approach

handbook of chemical technology and pollution control meets the requirements of practicing professionals and consultants for a concise reference to the key features relative importance and environmental impact of currently operating chemical processes the book is also designed to meet the critical needs of students training for industrial careers coverage includes the major inorganic and organic commodity chemicals aluminum iron and steel and copper production pulp and paper fermentation petroleum production and refining plus key topics and process details for major petrochemicals and large scale consumer and engineering polymers aspects of recycling at the industrial and postconsumer levels are described for many of these materials a quantitative approach is emphasized throughout as used in the author's well known life cycle work with disposable and reusable cups

computer modeling applications for environmental engineers in its second edition incorporates changes and introduces new concepts using visual basic net a programming language chosen for its ease of comprehensive usage this book offers a complete understanding of the basic principles of environmental engineering and integrates new sections that address noise pollution and abatement and municipal solid waste problem solving financing of waste facilities and the engineering of treatment methods that address sanitary landfill biochemical processes and combustion and energy recovery its practical approach serves to aid in the teaching of environmental engineering unit operations and processes design and demonstrates effective problem solving practices that facilitate self teaching a vital reference for students and professional sanitary and environmental engineers this work also serves as a stand alone problem solving text with well defined real work examples and explanations

completely revised and updated treatment wetlands second edition is still the most comprehensive resource available for planning designing and operating wetland treatment systems it provides engineers and scientists with a complete reference source that includes detailed information on wetland ecology design for consistent performance site specific studies estimated costs construction guidance and operational control through effective monitoring case histories of operational wetland treatment systems illustrate the variety of design approaches presented allowing readers to tailor them to the needs of their projects

a concise summary of the present principles and theories on water pollution control processes and treatments applicable to specific sewage and

industrial wastewater problems to define significant parameters in water quality engineering and to develop design procedures for the wastewater treatment processes in most common use today useful as an introductory text for engineers from other disciplines engaged in the water quality field as well as providing engineering guidelines for the solution of particular problems

lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the nasa scientific and technical information database

complete coverage of the state of the art in water resource recovery facility design featuring contributions from hundreds of wastewater engineering experts this fully updated guide presents the latest in facility planning configuration and design design of water resource recovery facilities wef manual of practice no 8 and asce manuals and reports on engineering practice no 76 sixth edition covers key technical advances in wastewater treatment including advances with membrane bioreactors applications advancements within integrated fixed film activated sludge ifas systems and moving bed biological reactors systems biotrickling filtration for odor control increased use of ballasted flocculation enhanced nutrient control systems sidestream nutrient removal to reduce the loading on the main nutrient removal process use and application of wireless instrumentation use and application of modeling wastewater treatment processes for the basis of design and evaluations of alternatives process design and disinfection practices to minimize generation of tthms and other organics monitored for potable water quality approaches to minimizing biosolids production and advances in biosolids handling including effective thermal hydrolysis and improvements in sludge thickening and dewatering technologies increasing goals toward energy neutrality and driving net zero trend toward resource recovery

intended to assist academic librarians and other information professionals in better exploiting the information resources available through the national technical information service ntis this two part manual offers practical suggestions and strategies for making ntis information services and products available through academic libraries suggestions to increase academic librarians awareness of and access to ntis services and products are offered in the first section of the manual including development of a knowledge base of ntis services and products taking into account the basic considerations of

access bibliographic control and microfiche use development of collections of ntis materials promotion of ntis materials within and outside the library development of an ntis service plan and increasing the use of ntis materials this portion of the text is supplemented with 6 figures and 21 references are provided the second part of the manual which identifies core collections of ntis reports reference materials microfiche diskettes and magnetic tapes within 16 major subject areas is intended to help librarians in any setting determine which ntis titles are significant for particular subject areas and to allow librarians to better integrate ntis materials into their collections indexes by ntis document title and by order number are included instructions for searching oclc for ntis materials and an ntis order form are appended km
