the history of mining is replete with controversy of which much is related to environmental damage and consequent community outrage over recent decades this has led to increased pressure to improve the environmental and social performance of mining operations particularly in developing countries the industry has responded by embracing the ideals of sustainability and corporate social responsibility mining and the environment identifies and discusses the wide range of social and environmental issues pertaining to mining with particular reference to mining in developing countries from where many of the project examples and case studies have been selected following an introductory overview of pressing issues the book illustrates how environmental and social impact assessment such as defined in the equator principles integrates with the mining lifecycle and how environmental and social management aims to eliminate the negative and accentuate the positive mining impacts practical approaches are

provided for managing issues ranging from land acquisition and resettlement of indigenous peoples to the technical aspects of acid rock drainage and mine waste management moreover thorough analyses of ways and means of sharing non transitory mining benefits with host communities are presented to allow mining to provide sustainable benefits for the affected communities this second edition of mining and the environment includes new chapters on health impact assessment biodiversity and gender issues all of which have become more important since the first edition appeared a decade ago the wide coverage of issues and the many real life case studies make this practice oriented book a reference and key reading it is intended for environmental consultants engineers regulators and operators in the field and for students to use as a course textbook as much of the matter applies to the extractive industries as a whole it will also serve environmental professionals in the oil and gas industries karlheinze spitz and john trudinger both have multiple years of experience in the assessment of mining projects around the world the combination of their expertise and knowledge about social economic and environmental performance of mining and mine waste management has resulted in this in depth coverage of the requirements for responsible and sustainable mining

courts have emerged as a crucial battleground in efforts to regulate climate change over the past several years tribunals at every level of government around the world have seen claims regarding greenhouse gas emissions and impacts these cases rely on diverse legal theories but all focus on government regulation of climate change or the actions of major corporate emitters this book explores climate actions in state and national courts as well as international tribunals in order to explain their regulatory significance it demonstrates the role that these cases play in broader debates over climate policy and argues that they serve as an important force in pressuring governments and emitters to address this crucial problem as law firms and public interest organizations increasingly develop climate practice areas the book serves as a crucial resource for practitioners policymakers and academics

environmental law and policy in india affects all sections of society those most deeply affected are the poor displaced by deforestation dam building and degradation of natural resources they are the first victims of poor sanitation contaminated water polluted air and scarce wood this edition of environmental law and policy in india retains the familiar analytical structure of the 1991 edition but is thoroughly revised and updated more than 4 5ths of the material is new the volume is interlaced with notes comments and questions to encourage critical thinking among lawyers and law students it compiles all the leading cases in environmental law in india with concise extracts of landmark judgments and documents it focuses on environmental law policy problems and needs with the comprehensiveness of an american law case book

the year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally much of the information and knowledge that was created in this field during the year was the result of the findings of the fourth session report ar4 of the intergovernmental panel on climate change ipcc which were disseminated on a large scale and reported extensively by the media this was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the ipcc itself proactively attempted to spread the findings of its ar4 to the public at large the interest generated on the scientific realities of climate change was further enhanced by the award of the nobel peace prize to the ipcc and former vice president of the us al gore by taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the norwegian nobel committee has clearly drawn the link between climate change and peace in the world

this collection draws students into conversation about global environmental threats the tenuous links between knowledge and power and ways of acting powerfully in service of sustainability visit our website for sample chapters

international law governing the settlement of disputes through law based forums such as courts tribunals and arbitral tribunals is fraught with limitations that are becoming especially apparent with respect to disputes that involve the protection of the environment however despite the deficiencies of the law international courts and tribunals have issued judgements in disputes involving the protection of the environment at the global level the international court of justice icj the appellate body of the

world trade organization wto and the tribunal for the law of the sea itlos have handed down decisions in relevant cases in addition other legal forums can also be called upon to decide cases involving international environmental law such forums include the environmental chamber of the icj and the permanent court of arbitration pca under its general facilities and under the environmental facility that it is planning to establish similarly special bodies such as the united nations compensation commission uncc may decide on cases moreover regional forums such as the european court of human rights echr the inter american court of human rights and the court of justice of the european community ecj have ruled on cases involving international environmental law despite these developments calls for the establishment of an international environmental court at the global level persist several arguments have been advanced to justify the establishment of an international environmental court for example the very many pressing environmental problems that exist today and the need for a bench consisting of experts in international environmental law to consider these problems the need for individuals and groups to have access to environmental justice at the international level the need to enable international organizations to be parties to disputes related to the protection of the environment and the need for dispute settlement procedures that enable the common interest in the environment to be addressed arguments against the establishment of an international environmental court have been advanced as well these arguments include the following the proliferation of international courts and tribunals would result in the fragmentation of international law existing courts and tribunals are or can be well equipped to consider cases involving environmental issues and disputes involving international environmental law also involve other aspects of international law this publication explores the arguments for and against the establishment of an international environmental court examining topics such as the definition of an international environmental dispute and the concomitant expertise required on the bench fragmentation and its root causes access to justice and the representation of community interests the author argues that the establishment of an international environmental court is not the most desirable option and she suggests that it might be more fruitful if we consider developments in environmental law as well as in other relevant areas of international law from a different perspective namely that of administrative law and reassess the relationship between international and national law such an approach she argues is warranted if inter alia viable means for resolving environmental disputes that may arise are to be identified

the first large scale systematic investigation of how interaction among international institutions affects global environmental governance with a conceptual framework and ten case studies
