this anthology designed for use in undergraduate courses in environmental ethics includes new and classic readings by leading writers in the field full length case studies and many short discussion cases introductions and discussion questions are provided for all the essays with each chapter introduced by a summary of the issues and appropriate philosophic historical and scientific background exploring ethical theory environmental ethics science and the environmental movement earthcare also offers suggestions for students on how to think about ethics and the environment through many worldviews religions and philosophical perspectives this collection grapples with environmental ethics issues from valuing nature concerns about the atmosphere water land animals and human population as well as the interlocking and often problematic interests of business consumption energy and sustainability this book also features examples of a wide variety of environmentally engaged individuals giving students a way of seeing the connections between the material studied and what they themselves might accomplish

no one looking ahead at the middle of the last century could have foreseen the extent and the importance of the ensuing environmental crises now more than a decade into the next century no one can ignore it a new environmental ethics the next millennium for life on earth offers clear powerful and oftentimes moving thoughts from one of the first and most respected philosophers to write on the environment rolston an early and leading pioneer in studying the moral relationship between humans and the earth surveys the full spectrum of approaches in the field of environmental ethics this book however is not simply a judicious overview instead it offers critical assessments of contemporary academic accounts and draws on a lifetime of research and experience to suggest an outlook for the future as a result this focused forward looking analysis will be a necessary complement to any balanced textbook or anthology in environmental ethics and will teach its readers to be responsible global citizens and residents of their landscape helping ensure that the future we have will be the one we wish for

what is the ethical significance of the environment how shall we dwell on and with the earth and what if anything do we owe to future generations time and the land pursues these questions through each of the four most prominent theories of ethics in the western philosophical tradition utilitarianism distributive justice kantian deontology and virtue ethics for each theory derek parfit's non identity problem serves as a test case parfit showed how some environmental policy decisions might harm no one in the far distant future even if they produce

situations all would agree are intrinsically repugnant myers seeks a theory of environmental ethics that not only responds to pressing moral problems in environmental policy but also avoids the paradox of the non identity problem myers concludes that no single theory by itself can accomplish this task a synthesis of ethics is required but virtue must lead the way as virtue is not a utility maximizing theory it avoids the non identity problem at the same time its potential for responding to environmental ethics dilemmas is deep myers concludes that the aim for a worthwhile human life must include the aim to create and sustain the environmental conditions in which the worthwhile human life is possible and supported a virtuous person takes care of the future through aiming at ends which are while achievable in the present also temporally continuous and ongoing even beyond the one s own lifetime and the future which it is virtuous to aim for is the one which brings out one s best qualities in the course of striving for it

as the destructive consequences of environmental problems such as global warming water scarcity and resource and biodiversity destruction have been felt ever more heavily people are becoming more aware of the importance of and their responsibilities towards environmental protection the causes of our problems are anthropogenic the number of people working in what might be termed environmental industries or with environmental responsibilities in their day to day work has mushroomed in many cases however individuals charged with protecting the environment have a set of empirical priorities what is done rather than moral priorities which consider what should be done the need to harmonize environmental knowledge with ethical behaviour and thus achieve behavioural change and the internalization of environmentally ethical values has never been more urgent this book developed as part of an eu programme to diffuse the application of environmental ethics to decision making on pollution control is a response to the need for a restatement of environmental ethics and for a code of behaviour and set of values that can be internalised and adopted to guide the actions by individuals at the sharp end of protecting the environment decision makers and environmental experts executives staff working in municipalities and public government organisations throughout the eu and turkey it is nothing short of an ethical training manual that will guide environmental experts decision makers in making sound judgements and decisions and will act as a bridge between environmental knowledge and environmental behaviour the book will be essential reading for decision makers and experts working in local authorities and governmental organisations with responsibility for environmental protection for both graduate and postgraduate students in environment related disciplines and for vocational education teachers with a focus on the environment

through a series of multidisciplinary readings environmental ethics the big questions contextualizes environmental

ethics within the history of western intellectual tradition and traces the development of theory since the 1970s includes an extended introduction that provides an historical and thematic introduction to the field of environmental ethics features a selection of brief original essays on why to study environmental ethics by leaders in the field contextualizes environmental ethics within the history of the western intellectual tradition by exploring anthropocentric human centered and nonanthropocentric precedents offers an interdisciplinary approach to the field by featuring seminal work from eminent philosophers biologists ecologists historians economists sociologists anthropologists nature writers business writers and others designed to be used with a web site which contains a continuously updated archive of case studies environmental ethics info

this volume works to connect issues in environmental ethics with the best work in contemporary normative theory environmental issues challenge contemporary ethical theorists to account for topics that traditional ethical theories do not address to any significant extent this book articulates and evaluates consequentialist responses to that challenge contributors provide a thorough and well rounded analysis of the benefits and limitations of the consequentialist perspective in addressing environmental issues in particular the contributors use consequentialist theory to address central questions in environmental ethics such as questions about what kinds of things have value about decision making in light of the long term intergenerational nature of environmental issues and about the role that a state s being natural should play in ethical deliberation

a comprehensive introductory textbook that integrates environmental ethics with social and religious perspectives this cross disciplinary approach helps students understand the depth and breadth of environmental issues in a globally relevant way environmental problems are explained by ecological social ethical and religious dimensions that inspire environmental conservation it underlines the reasons why intrinsic values of nature and those who inhabit it must be taken into consideration when making decisions that affect them this book is also intended for those interested in understanding the environmental debate which is a critical component of environmental management features presents the historical review of the environmental movement introduces ethical reasoning in environmental problems explains environmental ethic approaches and practical implications discusses the role of religions in nature conservation and eco theology includes exercises for reflection in each chapter to stimulate student engagement with environmental issues this great textbook gives readers new insight into caring for the environment it is for undergraduate and graduate students taking courses in environmental studies geography sociology anthropology and philosophy as well as professionals in environmental management and environmental policy and for those interested in environmental issues and the ethics of nature conservation

whatever its origins environmental virtue ethics now appears to be a vital part of the environmental philosophy landscape whether you look to it for an alternative to other theoretical approaches to environmental ethics or as a complement to them there are a number of ways it clarifies our environmental choices and responsibilities this is an exciting collection that addresses compelling issues not only in environmental ethics but in environmental philosophy more broadly in addition to their individual merits these articles collectively demonstrate the value of environmental philosophy and the value of environmental philosophy in helping create sustainable societies and preserve nature recent movement on negotiating a strong successor to the kyoto treaty gives some hope that the world is waking up to the moral imperative to protect the earth but whether people will be willing to ratchet down our economic demands and reshape our economies to reflect this hoped for moral progress remains to be seen previously published in the journal of agricultural and environmental ethics volume 23 1 2 2010

explores ethical issues related to environmental conservation and sustainability discusses the moral responsibilities of individuals and societies

can aesthetics and ethics be integrated for the good of habitats places and spaces how can the arts widen our perception of nature and deepen environmental ethics should the political meaning of a landscape be defined solely in terms of its economic and ecological values questions like these are explored from the angles of arts environmental ethics ecology religious studies theology art history and philosophy the book prompts discussion about the aesthetic and spiritual dimension in the environmental humanities and it offers transdisciplinary insights into the challenge of sustainability and ongoing changes in society and the environment series studies in religion and the environment studien zur religion und umwelt vol 7
