money from trash plastic waste has become a major environmental concern in today's world the excessive use of plastic and its improper disposal has led to the pollution of our oceans landfills and even our air however instead of viewing plastic waste as a problem we can see it as an opportunity with the right technology and processes plastic waste can be transformed into high quality secondary raw material which can be used in various industries this not only helps in reducing the amount of plastic waste in our environment but also creates a new source of income by turning trash into money we can incentivize individuals and businesses to properly manage their plastic waste this could potentially lead to a cleaner and more sustainable future for our planet through the efficient processing of plastic waste we can not only tackle the issue of pollution but also create a circular economy where waste is seen as a valuable resource it is time for us to rethink our approach towards plastic waste and explore its potential as a secondary raw material

the 18th cirp international conference on life cycle engineering Ice 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management the theme glocalised solutions for sustainability in manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective glocalised solutions for sustainability in manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions products and services need to be addressed that ensure a high standard of living everywhere resources required for manufacturing and use of such products are limited and not evenly distributed in the world locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle the 18th cirp international conference on life cycle engineering Ice 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas
