the complete guide to building the mindset knowledge and skills of a professional options trader if you're a day trader or a sophisticated individual investor you can move to the next level trading options as a full time gig and make a profit professional options trader marcel link argues that the most successful traders are the ones who treat trading like a business it's how he turned trading into a full time job and he shares all his secrets with you in the high probability options trader link explains how to take advantage of online tools offers a thorough but easy to understand explanation of option greeks and provides many effective strategies including selling options and spreads with high volatility making time decay work in your favor using different time spreads staying delta neutral and using butterflies and condors he explains how to trade during earnings how to use technical analyses to time trades and how to manage risk specific topics include learning to understand and take full advantage of a broker's platform what options are and how they're best used methods for valuing options choosing underlying stocks indexes etfs and futures to trade using options to protect your portfolio from market turns managing your options portfolio reading marketing conditions to make the right investing decisions placing orders and timing trades developing and implanting risk management strategies option trading has seen a tremendous surge in popularity in recent years with volume records being broken consistently yet many newer traders don't trade options correctly apply the lessons in the high probability options trader to learn how to build a lucrative career in this rapidly expanding market

my principle strategy for trading weekly index options uses 2 sigma iron condors short calls 2 standard deviations above the market and the long calls the next strike price higher short puts 2 standard deviations below the market and the long puts the next strike price lower this is called 2 sig iron condors i have developed a procedure to make a weekly profit using iron condors my objective is to show you how to make a weekly profit of 150 week with 2 condors as your capital increases with trading profits then you increase the number of condors then your weekly profit increases as the capital grows for example if the capital in your broker account permits 4 condors then the weekly profit would increase to 300 per week the weekly profit per capital 150 2000 7.5 per week selfadapspxweeklyvlt is the name of my software which i use to generate weekly profits this book describes how to use the trademonster real time spx weekly option quotes my software selfadapspxweeklyvlt computes the strike prices used for the weekly option trades if you have another source

for real time spx weekly option quotes then that source can be used instead of the trademonster source you must have a minimum of 2000 in your broker account to do weekly iron condor trading this book recommends starting with 2500 and presents a capital growth model that shows that using the trading procedure herein this initial capital of 2500 could grow to 300 000 in 2 years weekly index options became available on the chicago board of options exchange in 2003 i have watched this type of options trading evolve as more investors used weekly trading i have changed my trading software to reflect this evolution i made my software simpler by limiting it to spx for the weekly options trading

the essential guide to launching a successful career in trading updated for today s turbulent markets mastering the trade is an excellent source for a basic understanding of market action be it day and or longer term trend trading a programmer will have a field day with the many ideas that are in this book it is highly recommended john hill president of futures truth magazine john carter s new book focuses quickly on the critical area of trader psychology a realm that will often separate the trader from his wallet if it is not mastered first the in depth trading strategies clearly show how to respond to market moves based on real world examples price headley founder of bigtrends com and author of big trends in trading well written and packed with the kind of insight about the nature of trading and the markets that can surely benefit every level of trader mark douglas author of trading in the zone and the disciplined trader this is a must read for all new traders specifically for the psychological aspect of trading i am recommending it to all of my clients carolyn boroden fibonacciqueen com about the book when it was first published in 2005 mastering the trade became an instant classic in the world of day trading now veteran day trader and educator john f carter has updated his time proven swing trading technique to help you succeed in an environment vastly transformed by volatility and technology universally acclaimed for its sophisticated yet easy to execute methods this practical results driven guide provides everything you need to make a lucrative career as a day trader from preparing yourself psychologically for the unique demands of day trading to timing the market managing risk and planning future trades mastering the trade sets aside timeworn basics and rehashed ideas to examine in detail the underlying factors that cause prices to move providing the tools you need to make the right decisions at the right times it helps you enter market shifts early and either pull out before losses accrue or hang on for a long and refreshingly predictable ride mastering the trade covers the five psychological truths that will transform you from a mistake prone novice into a savvy trading professional exact entry exit and stop loss levels for the intraday trading of stocks options etfs e mini futures 30 year bonds currencies and more seven key internals from ticks

to five minute volume critical for gauging pending market direction from the opening bell premarket checklists for analyzing recent market behavior and calculating on each trading day what you plan to do how you plan to do it and why airtight risk control techniques for protecting trading capital the most important component of a professional trading career after spending many years on various trading desks carter has developed an intuitive understanding of how the markets work in mastering the trade he gives you unlimited access to everything the markets have taught him so you can make an exceptional living on the frontlines of professional trading

the complete package for succeeding in options this exciting combo from experienced options trader michael sincere provides an a to z education on low risk options trading if you re interested in building a powerful options portfolio the ultimate guide to understanding and trading options two book bundle has everything you need this unmatched investing package provides the foundational knowledge you need to get started with confidence along with effective hands on methods for generating profits with minimal risk now considered an investing classic understanding options explains all the basics including overcoming assignment anxiety leaps the greeks protective and married puts collars credit and debit spreads straddles strangles and options tips then make money trading options provides battle tested strategies for finding the best stocks identifying the overall market environment deciding whether to go long or short and using a ground breaking method to determine which stocks are in play most important you ll learn money management techniques to avoid the most common pitfalls that blow up traders accounts

the behavior of the us and world stock markets is caused by fear of the big traders on days when the market suffers a loss greater than 2 sigma by hope when the market enjoys an increase greater than 2 sigma and changes very little when the big traders are cautious during a trading day to cause wealth to grow we must use options trading strategies that make profits and limit or avoid losses when the market makes sudden erratic movements as well my software program selfadapjonweeklycndrs has evolved during the last 25 years of options trading by your author dr jon schiller starting with a london broker trading ftse 100 options placing orders by fax ending with tradeking broker placing orders using their trading automated website i modified my software during my 25 years of trading to change as the market changed i started using naked index option spreads which requires 50k in your options account i modified the strategy to use covered index option spreads which capital in your options account based on the number of spreads and the strike price

spacing i tried wwi triggered debit spreads i switched to condors simultaneous call and put 2 sigma spreads then a few years ago when weekly options became available from the cboe i switched to 2 sigma weekly options using condors as the best way to make wealth grow the best weekly options to consider for trading by sorting thru the indices and stocks tracked by my old software i found there were several weekly options that were worth tracking in today s market the new software program is selfadapjonweeklycndrs which uses the strategies tools described in this book the excel based software uses cboe quotes for the options data and computes the 2 sigma values for the stocks indices tracked in the software presents the option iron condors for the same stocks indices the main option strategy is to use weekly options which become available with market open on thursday for expiration on friday a week and one day after the options become available the neural network signal indicator using 6 signal indicators to compute the market trends to show when the market is probable to change direction every 3rd friday of each month the monthly options expire therefore on the second friday of the month there is only a week left in the trading month so all stock options become weekly options so you may select the best of all the stocks for the weekly condor to open on the friday or monday before the 3rd friday i should point out that almost every week the spy condors become best using return on margin as the metric i use tradeking as a broker for two reasons their commissions are the lowest of the brokers i know about their website is automated so placing the condor or other type option orders is easy to do just select the strategy to use the automated website will appear and enter the parameters for the option if you get your capital to grow above 50 000 some brokers will allow you place naked spread orders in which you sell the 2 sigma call and 2 sigma put for a spread with tradeking you must place a pseudo naked spread a strategy i will describe in chapter 5

renowned options expert david caplan shows investors how to analyze probabilities and create options positions that place the odds squarely in their favor a savvy streetwise book the new options advantage eschews theory in favor of providing readers with strategies that really work completely updated this edition contains an expanded discussion of volatility on of the most important factors in options trading packed full of insights derived from years of successful trading the new options advantage will appeal to a wide spectrum of traders specific topics include the trading edge philosophy understanding and using option volatility identifying and exploiting undervalued and overvalued options strategies for different market outlooks using a computer to trade options
