in this book we present a collection of papers around the topic of agent communication the communication between agents has been one of the major topics of research in multiagent systems the current work can therefore build on a number of previous workshops of which the proceedings have been published in earlier volumes in this series the basis of this collection is formed by the accepted submissions of the workshop on agent communication held in conjunction with the aamas conference in july 2004 in new york the workshop received 26 submissions of which 14 were selected for publication in this volume besides the high quality workshop papers we noticed that many papers on agent communication found their way to the main conference we decided therefore to invite a number of authors to revise and extend their papers from this conference and to combine them with the workshop papers we believe that the current collection comprises a very good and quite complete overview of the state of the art in this area of research and gives a good indication of the topics that are of major interest at the moment the papers can roughly be divided over the following five themes social commitments multiparty communication content languages dialogues and conversations speech acts although these themes are of course not mutually exclusive they indicate some main directions of research we therefore have arranged the papers in the book according to the topics indicated above
