the brilliant and daringly original the new york times critique of digital networks from the david foster wallace of tech london evening standard asserting that to fix our economy we must fix our information economy jaron lanier is the father of virtual reality and one of the world s most brilliant thinkers who owns the future is his visionary reckoning with the most urgent economic and social trend of our age the poisonous concentration of money and power in our digital networks lanier has predicted how technology will transform our humanity for decades and his insight has never been more urgently needed he shows how siren servers which exploit big data and the free sharing of information led our economy into recession imperiled personal privacy and hollowed out the middle class the networks that define our world including

social media financial institutions and intelligence agencies now threaten to destroy it but there is an alternative in this provocative poetic and deeply humane book lanier charts a path toward a brighter future an information economy that rewards ordinary people for what they do and share on the web

a full executive summary of who owns the future by jaron lanier this is not a chapter by chapter summary rather the author takes an holistic approach reorganizing and breaking down the content for easier understanding where necessary and cutting out the repetition

how did capital one and uber implement nearly identical business models focusing on customers that are most profitable to serve why are google and amazon so valuable to us why are google apple microsoft and amazon so difficult for competitors to displace and why can google charge almost anything it wants for keywords since no form of competition will force prices down the information based business models of these companies and many more are exploiting the patterns described in this book this book instills pattern based thinking that will prepare all readers for greater success in our rapidly changing world it will help executives regulators investors and concerned citizens better navigate their way through the digital transformation of everything professor clemons presents six patterns for staying competitive and achieving profitable business models the author sreframe recognize respond framework teaches readers how to transform unfamiliar problems into familiar patterns how to determine which patterns to apply in different situations and how to respond most effectively information changes everything this book is a guide to power and profit from understanding changes in the age of digital transformation

please note this is a companion version not the original book sample book insights 1 the price we pay for the illusion of free information is that most of the overall economy isn't about information eventually most productivity will become software mediated this could lead to a period of hyper unemployment and political and social chaos 2 people are becoming poorer than they need to be because popular digital designs do not treat people as being special enough in the digital world people are treated as small elements in a bigger information machine when in fact people are the only sources or destinations of information 3 the primary influence on the way technologists think about the future is their direct experience of digital networks through consumer electronics as information technology becomes millions of times more powerful any particular use of it becomes cheaper 4 the cloud is driven by statistics and even in the worst individual cases of personal ignorance dullness idleness or irrelevance every person is constantly feeding data into the cloud these days the value of such information could be treated as genuine but it is not

digital democracy is a hot topic nowadays its relevance growing along with the impact of computational platforms on our political life communication is the basal fabric on which society is defined and it appears obvious that the civic organisation and politics

itself should take the opportunities the digital revolution offers institutional inertia nevertheless causes large delays in updating and adapting therefore the balance between participation and delegated representation is now facing a crisis a thorough understanding of the factors involved in participation is a first step towards providing solutions using the internet to fill the gap and build a digital democracy provides an opportunity along with several risks that need to be carefully analysed it needs to be implemented using a fully inter and trans disciplinary perspective the six contributions included in this state of the art survey present research in the field of social sciences as well as mathematics and computer science and aim at contributing to a better understanding of the potential and dangers of digital democracy helping readers go beyond the misunderstandings the misconceptions and the conceptual and practical abuses that the very notion of democracy is undergoing during this age of technological revolution and social turmoils

jaron aches is the jutak warrior everyone counts on to keep things light but what happens when he s captured by a mad man will he succumb to the darkness sasha f lan has led a tough life but it s what makes her a good bounty retriever until someone she trusts leads her into a trap now she has to put her faith in the stranger trapped in the cage next to her if she hopes to escape they trusted each other when they had no one else then betrayal tore them apart can they overcome the lies to accept the love they both deserve

the father of virtual reality explains its dazzling possibilities by reflecting on his own lifelong relationship with technology named one of the best books of 2017 by the

economist the wall street journal vox a deeply human highly personal and beautifully told story dave eggers bridging the gap between tech mania and the experience of being inside the human body dawn of the new everything is a look at what it means to be human at a moment of unprecedented technological possibility through a fascinating look back over his life in technology jaron lanier an interdisciplinary scientist and father of the term virtual reality exposes vr s ability to illuminate and amplify our understanding of our species and gives readers a new perspective on how the brain and body connect to the world an inventive blend of autobiography science writing philosophy and advice this book tells the wild story of his personal and professional life as a scientist from his childhood in the ufo territory of new mexico to the loss of his mother the founding of the first start up and finally becoming a world renowned technological guru understanding virtual reality as being both a scientific and cultural adventure lanier demonstrates it to be a humanistic setting for technology while his previous books offered a more critical view of social media and other manifestations of technology in this book he argues that virtual reality can actually make our lives richer and fuller a highly eccentric memoir that traces the author s quest for vr back to its roots not as some sort of geeky engineering challenge but as a feeling he had as a child of being overwhelmed by the magic of the universe the wall street journal intimate and idiosyncratic quirky and fascinating lanier s vivid and creative imagination is a distinct character in this book his vision is humanistic and he insists that the most important goal of developing virtual reality is human connection the new york times book review

no marketing blurb

in this smart playful and provocative book one of today s most original business thinkers argues that we underestimate the importance of romance in our lives and that we can find it in and through business by designing products services and experiences that connect us with something greater than ourselves against the backdrop of eroding trust in capitalism pervasive technology big data and the desire to quantify all of our behaviors the business romantic makes a compelling case that we must meld the pursuit of success and achievement with romance if we want to create an economy that serves our entire selves a rising star in data analytics who is in love with the intrinsic beauty of spreadsheets the mastermind behind a brand built on absence an argentinian couple who revolutionize shoelaces the founder of a foodie oriented start up that creates intimate conversation spaces a performance artist who offers fake corporate seminars for real professionals these are some of the innovators readers will meet in this witty deeply personal and rousing ramble through the world of business romanticism the business romantic not only provides surprising insights into the emotional and social aspects of business but also presents rules of enchantment that will help both individuals and organizations construct more meaningful experiences for themselves and others the business romantic offers a radically different view of the good life and outlines how to better meet one s own desires as

well as those of customers employees and society it encourages readers to expect more from companies to give more of themselves and to fall back in love with their work and their lives

named a best book of the year by the economist wall street journal vox the father of virtual reality sunday times explains why virtual reality presents the ultimate test for humanity essential reading not just for vr watchers but for anyone interested in how society came to be how it is and what it might yet become economist welcome to a mind expanding life enhancing world changing adventure virtual reality has long been one of the dominant clichés of science fiction now virtual reality is a reality from the startling beauty of lifelike video games to the place where war veterans overcome ptsd surgeries are trialled and aircraft and cities are designed vr is in fact now the most effective device ever invented for researching what a human being actually is and how we think and feel more than thirty years ago legendary computer scientist visionary and artist jaron lanier pioneered its invention here he blends scientific investigation philosophical thought experiment and his memoir of a life lived at the centre of digital innovation to explain what vr really is the science of comprehensive illusion the extension of the intimate magic of earliest childhood into adulthood a hint of what life would be like without any limits we are standing on the threshold of an entirely new realm of human creativity expression communication and experience and as we use vr to test our relationship with reality it may test us in return vivid and absolutely extraordinary evening standard

the author of console wars reveals the story behind oculus and its quest for virtual reality masterful filled with unforgettable characters forbes from iconic books like neuromancer to blockbuster films like the matrix virtual reality has offered a tantalizing vision of the future but outside of a few research labs and military training facilities this technology was mere science fiction until 2012 when oculus founder palmer luckey then just a teenage dreamer living alone in a camper trailer invents a device that has the potential to change the world with the help of a videogame legend a serial entrepreneur and many other colorful characters luckey s scrappy startup kickstarts a revolution and sets out to bring vr to the masses what follows is the ultimate entrepreneurial journey a tale of battles won and lost lessons learned and shocking turns including an unlikely multi billion dollar acquisition by facebook s mark zuckerberg drawing on over a hundred interviews with the key players driving this revolution the history of the future weaves together a rich cinematic narrative that captures the breakthroughs breakdowns and human drama of trying to change the world the result is a supremely entertaining look at the birth of a game changing new industry

annotated selections from past issues of mondo 2000

describes more than 250 new gadgets foods and forms of transportation that may be available by the year 2000

veteran science journalist seth shulman takes us on a shocking journey through today's battles for control over the intangible new assets genes software databases and scientific information that make up the lifeblood of the new economy we meet doctors who sue colleagues for using new medical procedures they claim to own we find university researchers thrown in jail for stealing their own ideas software firms holding the entire industry for ransom over basic widely used programming techniques and life saving cancer treatments kept from dying patients by legal wrangles over the underlying technology

following the footsteps of future shock and megatrends this is a pulse quickening look at the 21st century from medicine to space to the environment all trends are explored
