this kenya guidebook is perfect for independent travellers planning a longer trip it features all of the must see sights and a wide range of off the beaten track places it also provides detailed practical information on preparing for a trip and what to do on the ground this kenya guidebook covers nairobi and around the central highlands rift valley western kenya the national parks and mombasa highway the coast the north

inside this kenya travel book you ll find a wide range of sights rough guides experts have hand picked places for travellers with different needs and desires off the beaten track adventures family activities or chilled out breaks itinerary examples created for different time frames or types of trip practical information how to get to kenya all about public transport food and drink shopping travelling with children sports and outdoor activities tips for travellers with disabilities and more author picks and things not to miss in kenya mount kenya mara naboisho conservancy thimlich ohinga lake baringo starry nights lake turkana cultural festival fresh coconuts chameleons lake naivasha nairobi national park coral reef warrior training insider recommendations tips on how to beat the crowds save time and money and find the best local spots when to go to kenya high season low season climate information and festivals where to go a clear introduction to kenya with key places and a handy overview extensive coverage of regions places and experiences regional highlights sights and places for different types of travellers with experiences matching different needs places to eat drink and stay hand picked restaurants cafes bars and hotels practical info at each site hours of operation websites transit tips charges colour coded mapping with keys and legends listing sites categorised as highlights eating accommodation shopping drinking and nightlife background information for connoisseurs history culture art architecture film books religion diversity fully updated post covid 19 the guide provides a comprehensive and rich selection of places to see and things to do in kenya as well as great planning tools it s the perfect companion both ahead of your trip and on the ground

a meticulously clear account of how early ape men of the african savanna developed into fully human beings leakey has always been interested in far more than the mere physical features presented by fossils and here he is particularly concerned with non tangible human attributes such as art language and consciousness itself leakey s personal involvement in many of the key discoveries of hominid fossils and his friendships and rivalries with his fellow fossil hunters add more than a dash of spice to his narrative an outstanding account of our current understanding of human evolution sunday times an elegant summary of what is currently known about human evolution observer

cosmic roots traces the five thousand year conflict between science and religion and how it has shaped our modern secular worldview told with rare clarity and striking insight this fascinating and thought provoking book focuses on the history of cosmology and its sister science astronomy for it was discoveries within these great

disciplines which first led to the conflict between science and religion the story begins with the cosmological beliefs of the ancients from the flat earth models of the sumerians and hebrews to the greek notion of the orbits of planets as divine circles topics progress from aristotle and ptolemy s integrated planetary models to the sun centered cosmologies of copernicus galileo kepler and the great isaac newton their combined scientific achievements stand as testimony to the power and imagination of the human mind this meticulously researched narrative also traces the roots of western religion based on historical events and archeological evidence it takes us on a captivating journey through western religious history from ancient paganism to the ethical monotheism of the hebrews christians and moslems along the way we follow the rise and fall of civilizations of empires cycles of war and peace unification and division the book concludes with how darwin came up with his theory of evolution and the impact of modern physics on religious beliefs the cumulative effect of the scientific discoveries presented in cosmic roots has for better or for worse led to the separation of science and religion we see in western culture today

reviewed revised reedited republished on june 14 2015 this update includes a case study of a successful self published author who took 20 years to get published the case study is called maids of misfortune and it was added as an appendix also updated statistics from the publishing industry and various experts are referred to throughout the book where appropriate this book is a journey it is told as a story set in its historical context of what it means to do something you have never done before i invoke the names of people who have achieved great things by teaching themselves what they needed to know you are in good company with presidents and poets generals and soldiers rich men and poor men nobel prize winners artists architects inventors and scientists true some of these people were geniuses but most were just common men and women like you and me if they did it so can we the one thing they all have in common with you and me is that they had to teach themselves like you and me they were autodidactic no matter how frustrated they became they stayed focused on their goals and ultimately achieved them why because they never gave up even when it took 20 years they never gave up you and i are in good company so we won t give up when we run into difficulties self publishing is highly skilled technical work even for people who know what they are doing for you and me it is a daunting challenging task we must be inspired we must be motivated if you are like me and most other people your first try at self publishing will be frustrating ask other people to help you when you need it it s not an admission of failure it s a sign of wisdom to ask for help just never give up and you

will succeed perseverance will take you from an elementary basic skill level to an advanced highly skilled level patience with yourself is needed as time goes on you will get better and better at self publishing i guarantee it i have given you a set of tips and principles that helped me when i first began they will be worth your time to reflect on remember if we can connect to the stories of the people who came before us and were successful then we can be successful also the information in the book is complete and thorough like the previous edition i used the self publishing steps in the book to self publish this book anytime you feel like something is missing or incomplete understand that i have given you all of the information that i used to publish this book backtrack and you will surely find a solution to whatever problem you may be having finally the purpose of this book is to help you self publish to help you make your dream to become a successful writer a moneymaking writer come true it s not easy to do for everyone some of us require more effort to achieve the results we want for others self publishing is so easy that it seems like almost anyone can do it i did it and i believe you can do it too that s why i wrote this book to help you publish your book you can trust me because i have self published more than 100 times i know what i m talking about if you wait for a publisher you might never see your book s published without paying a high price if you self publish your book will be published in fact all of your books will be published how much will it cost you to get published absolutely nothing that s right 0 00 to get your book s published get this book and get started on your self publishing journey today

this book examines homo sapiens lost connection with nature and the aftermath homo sapiens excessive footprint on the earth itself the depredations done to earth by homo sapiens the denial of global warming and other environmental issues frankenstein science and those attempting to play god the conservation of earth what the future may perhaps entail and going back to nature and coexisting on earth the book contains many statistical facts on the subject matter being discussed with more than 715 references within the bibliography and more than 120 graphs satellite images and other photographs some of the subtopics covered in this book include agriculture and the origins of modern civilization meat dairy and egg consumption current medical epidemics prescription drug epidemic mental health and drug addiction government and corporate influence poverty money greed and corporate responsibility warmongers an incarcerated and policed society living with unwarranted fear guns religion suppression of history and knowledge education and the monetary value of history and knowledge the slaughter slavery and forced assimilation of indigenous

homo sapiens contemporary slavery children women family and individualism the mainstream news media world population mass consumption a surplus of senseless waste fashion cities water consumption desertification surface water and groundwater depletion wastewater and sewage sludge watercraft mineral extraction fossil fuels nuclear weapons and power toxic unnatural chemicals fertilizers and the nitrogen and phosphorus cycle pesticides atmospheric pollution ozone hole light and sound pollution hazardous waste and superfund sites synthetic plastic cannabis ocean garbage patches and beach trash lakes rivers wetlands and oceans coral reefs fish whaling dolphin driving military dolphins and sonar shark finning and other ancient pseudo medicines zoos pets fauna experimentation illegal and legal trade of florae and faunae hunting extinct species endangered and threatened species invasive florae and faunae forests soils intentional industrial related environmental depredations oils spills acid rain homo sapiens clash with nature coexisting with science and technology environmental legislation grassroots efforts simple individual changes eco generation globalization and world government homo sapiens pseudo connection with nature homo sapiens misconception of nature unwarranted fear of nature lost connection with nature and many other social and environmental issues past and present what readers have to say be forewarned if you read this book and understand it fully you will most likely not see the world the same way ever again and will contemplate much more about the world around you society itself and even yourself and the lifestyle you are living this book will make you think more about the earth and how truly impactful and self destructive we are this book is very insightful about the impacts we are having on earth and how we are destroying not only ourselves but the entire earth we inhabit excellent book very sad but very true i always knew we were destroying the earth but never at this magnitude this book contains so much useful information it s like an encyclopedia of the destruction of earth a must read for any conservationist environmentalist or anyone interested in helping to save earth if you don t believe in global warming or that we are destroying not only ourselves but the entire earth around us read this book and you will the most accurate and up to date statistics on the environmental and social issues currently facing humans a story which urgently needs to be told i admire both the depth of the research and the passion with which the author brings it to life i wish i could find more things to disagree with the author about

national geographic face to face readers is a high interest series of books for confident independent readers that have been adapted to a key stage 2 audience by education experts the books pair magnificent national geographic photographs with lively first

person text and fascinating facts about the natural world

which brilliant men and women have made ground breaking scientific discoveries over the centuries this series tracks the great scientific minds from all over the world from the earliest geniuses who lived thousands of years ago to modern scientists who are advancing knowledge way beyond our universe

a fascinating insight into how human sexuality came to be the way it is now Jared Diamond explains why we are different from the animal kingdom why are humans one of the few species to have sex in private why do humans have sex any day of the month or year including when the female is pregnant beyond her reproductive years or between her fertile cycles why are human females one of the few mammals to go through menopause human sexuality seems normal to us but it is bizarre by the standards of other animals Jared Diamond argues that our strange sex lives were as crucial to our rise to human status as were our large brains he also describes the battle of the sexes in the human and animal world over parental care and why sex differences in the genetic value of parental care provide a biological basis for the all too familiar different attitudes of men and women towards extramarital sex

in this volume a breakdown of the life and work of some of history's pioneers in the study of plants and animals are thoroughly explored it provides excellent biographical sketches for trailblazers in the sciences articles are devoted to specific scientists covering their contributions to their field specifically addressing how their research discoveries and inventions impacted human understanding and experience this volume covers names from around the world and throughout the centuries with a chapter specifically devoted to the top scientific contributors of the 21st century

extraordinary this inspirational autobiography stands among the finest scientist memoirs New York Times book review editors choice Meave Leakey's thrilling high stakes memoir written with her daughter Samira encapsulates her distinguished life and career on the front lines of the hunt for our human origins a quest made all the more notable by her stature as a woman in a highly competitive male dominated field in the sediments of time preeminent paleoanthropologist Meave Leakey brings us along on her remarkable journey to reveal the diversity of our early pre human ancestors and how past climate change drove their evolution she offers a fresh account of our past as recent breakthroughs have allowed new analysis of her team's fossil findings and vastly expanded our understanding of our ancestors Meave's own personal story is

replete with drama from thrilling discoveries on the shores of lake turkana to run ins with armed herders and every manner of wildlife to raising her children and supporting her renowned paleoanthropologist husband richard leakey s ambitions amidst social and political strife in kenya when richard needs a kidney meave provides him with hers and when he asks her to assume the reins of their field expeditions after he loses both legs in a plane crash the result of likely sabotage meave steps in the sediments of time is the summation of a lifetime of meave leakey s efforts it is a compelling picture of our human origins and climate change as well as a high stakes story of ambition struggle and hope a fascinating glimpse into our origins meave leakey is a great storyteller and she presents new information about the far off time when we emerged from our ape like ancestors to start the long journey that has led to our becoming the dominant species on earth that story woven into her own journey of research and discovery gives us a book that is informative and captivating one that you will not forget jane goodall phd dbc founder of the jane goodall institute

a multidisciplinary index covering the journal literature of the arts and humanities it fully covers 1 144 of the world s leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals

a personal tour through the world s great archaeological sites

briefly describes various areas of kenya as well as its history people and culture
