as of yet the remarkable and highly influential textual form of euclidean mathematics has not been considered from a literary aesthetic perspective by its extreme standardization and seeming non literariness it appears to defy such an approach this book nonetheless attempts precisely a literary aesthetic study of the language and style of euclid s elements focusing on book i it aims to find out what is literary about the form and what motivates this form as form in doing so it employs the concept of clarity asking how is the textual form related to logical and communicative clarity that is how far is the omnipresent standardization necessary for the accomplishment and successful communication of the proofs based on a close analysis of the standardization at all levels of the text lexicon grammar structure and especially diagram it argues that the textual form of the elements is standardized beyond logical communicative purposes and that it is in this sense aesthetic the book exposes the unexpected literary dimension of euclid s elements provides a new interpretation of the peculiar form of the work and offers a model for determining the role of clarity not only in greek theoretical mathematics
