how to speed up business processes improve quality and cut costs in any industry in factories around the world toyota consistently makes the highest quality cars with the fewest defects of any competing manufacturer while using fewer man hours less on hand inventory and half the floor space of its competitors the toyota way is the first book for a general audience that explains the management principles and business philosophy behind toyota s worldwide reputation for quality and reliability complete with profiles of organizations that have successfully adopted toyota s principles this book shows managers in every industry how to improve business processes by eliminating wasted time and resources building quality into workplace systems finding low cost but reliable alternatives to expensive new technology producing in small quantities turning every employee into a qualitycontrol inspector

the rapidly growing need for mobility has brought with it a major challenge for improvement in the operation and utilization of automotive systems the economical environmental and safety constraints imposed by the increase in the number of road vehicles and subsequent government policies also require substantial product development through the application of infor mation technology this involves the

enhancement of vehicle informatics and telematic systems with additional sensors and systems the advance in the design and development of automotive sensory systems is so rapid that there is urgent need for the experts involved in the technology to work together to provide a reference book for the engineer of today and tomorrow this motivated me to spend two years researching the topics and the basis on which such a book should be written the result is the present compilation of the work of international experts on the state of the art in the field of automotive sensory systems thus a unique collection has been created for the reference of all those concerned with or interested in the design and development of modern safe and intelligent vehicles although this book is intended for engineers managers scientists academicians and policy makers students should also find it valuable to meet the requirements of students the basics are explained in simple terms however it is hoped that others will appreciate this approach since most of us are well aware that gaps remain in our knowledge of the elements of our profession

toyota motor corporation made a system to make good products save money and make things faster by using less waste tps has two main parts just in time and jidoka it is often shown as a house image to improve tps and keep it running well we use a process called pdca or the scientific method we do this by doing the same tasks over and over again and making small improvements called kaizen tps was created by taiichi ohno who managed production at toyota after world war ii ohno began using tps at toyota in the 1950s and 1960s starting with machining work then he started using it in other parts of the company and also shared it with other suppliers in the 1960s and 1970s outside of japan the spread of toyota and general motors partnership called nummi began in california in 1984 the concepts of just in time jit and jidoka were created before the war a long time ago sakichi toyoda created the idea of jidoka and he also started the toyota group of companies he added a machine

to his looms that would stop the loom if a thread broke this improved the quality of things and let people concentrate on more important tasks instead of just checking machines for quality over time this basic idea became a part of every machine every production line and every toyota operation kiichiro toyoda who is the son of sakichi and the founder of toyota came up with the idea of jit just in time in the 1930s he said toyota should not have too many cars sitting unsold and they should try to work with their suppliers to make the same number of cars all the time ohno was in charge of making jit a special system to control how much we make and to avoid making too much tps was well known after the machine that changed the world was published in 1990 this book took five years to make and it was researched by the massachusetts institute of technology the researchers at mit found that tps was faster and more efficient than regular mass production it was a very different way of doing things so they called it lean production
