where are we ever going to use this every high school math student has asked this question often teachers themselves aren't sure how to respond one answer is that higher mathematics learned in high school will be essential to learning yet more at the college level a more satisfactory answer calls for an awareness of how math is applied in many specific areas written primarily for teachers this book presents hundreds of practical applications for mathematics from baseball statistics to the theory of relativity that can be understood by anyone with a knowledge of high school algebra geometry and trigonometry

in 1977 johnson's best selling *how long will south africa survive* offered a controversial and highly original analysis of the survival prospects of apartheid now after more than two decades of the anc in government he believes the question must be posed again the big question about anc rule johnson writes is whether african nationalism would be able to cope with the challenges of running a modern industrial economy twenty years of anc rule have shown conclusively that the party is hopelessly ill equipped for this task indeed everything suggests that south africa under the anc is fast slipping backward and that even the survival of south africa as a unitary state cannot be taken for granted the fundamental reason why the question of regime change has to be posed is that it is now clear that south africa can either choose to have an anc government or it can have a modern industrial economy it cannot have both
