saharan africa it is concerned with the question of how a coherent international migration policy can contribute to the fight against poverty in the book update information is given of migration development nexus in various countries including senegal and burkina faso botswana and mozambique nigeria and kenya attention is additionally paid to mexico the philippines and the people s republic of china

this book focuses on the indicators of fragility and the resilience of state led interventions to address them in sub saharan africa it analyzes the figure of fragile states as the unit the analysis and situates the study of fragility governance and political adaptation within contemporary global and local political economic and socio cultural contexts the chapters offer an indispensable econometrically informed guide to better understanding issues that have an impact on fragility in governance and nation building and affect policy making and program design targeting institutions in various circumstances these issues as they relate to the indicators of fragility are the contexts and correlates of armed conflicts on statehood and state fragility the poverty trap pandemics and household food insecurity and child labor case studies from across 46 sub saharan african ssa countries are assessed to offer clear broad and multidisciplinary views of what the future holds for them and the international donor communities at large regarding state led interventions the authors utilize insightful statistical methods and epistemologies to explain the correlates of behavioral language frames and conflict de escalation on battle related deaths across the conflict zones within the sub region the regional and country level interventions to end child labor the institutional frameworks and interventions in the advancement of food security and health this book will be of interest to scholars of economics development politics in developing countries area and african studies peace conflict and security studies

annotation orijiako who is not identified examines the hypothesis that rather than promoting growth and development in sub saharan africa foreign aid interventions may have contributed in no small measure to the poor performance of the region s economies challenging conventional views that problems are technical details of delivery or administration he suggests that an economy operating under appropriate circumstances and conditions may not require foreign aid to succeed and presents historical records common sense and cognate experiments to bolster the view c book news inc

the region is seeing a modest growth uptick but this is not uniform and the medium term outlook remains subdued growth is projected to rise to 3 4 percent in 2018 from 2 8 percent in 2017 on the back of improved global growth higher commodity prices and continued strong public spending about 3 4 of the countries in the region are predicted to experience faster growth beyond 2018 growth is expected to plateau below 4 percent modestly above population growth reflecting continued sluggishness in the oil exporting countries and sustained growth in non resource intensive countries a number of countries burundi drc south sudan and parts of the sahel remain locked in internal conflict resulting in record levels of refugees and internally displaced persons with adverse spillovers to neighboring countries

what is the impact on trade in sub saharan africa of the recent rapid growth in china and other asian countries and the associated commodity price boom this paper looks at how trading patterns both destinations and composition are changing in sub saharan africa has the region managed to diversify the products it sells from commodities to manufactured goods has it expanded the range of countries to which it exports and what about the import side the time is ripe for sub saharan african countries to climb up the value chain of their commodity based exports and or achieve an export surge based on labor intensive manufacturing

sub saharan africa literally remains the gift that keeps giving the more we know about this region of a rich and diverse continent the less we realize that we actually knew thus this book sub saharan africa culture history and people is an effort to yet again revisit a region that we thought we knew it is a culmination of eclectic research efforts both conceptual and empirical that focus on sub saharan africa from scholars around the world the book serves as useful compendium to those who already study the field and as an indispensable handbook to beginners who wish study the region

research paper undergraduate from the year 2014 in the subject engineering power engineering grade a university of cape town energy research center language english abstract the main objective of this paper is to analyse if a small scale pv diesel hybrid systems can be a feasible solution for electrification of a rural village in sub saharan africa the main question is if the hybrid system which covers a peak demand of 30 kwp can compete economically and technically with the traditional diesel power generators in a first step the current situation of rural electrification in sub sahara africa will be reviewed and different solutions for current electrification efforts will be analysed furthermore recommendations from available case studies and literature on optimal design of hybrid systems will be considered in a final step a simulation by using homer simulation software will compare a diesel generator solution against a pv diesel hybrid solution regarding initial investment cost levelized cost of electricity lcoe return on investment and payback

all of human history begins in sub saharan africa where scientists believe the first humans lived over time thousands of ethnic groups inhabited the area creating villages cities unique cultures and governments this book explores the historical events movements and people who have shaped the region of sub saharan africa over its long and varied history how did the transatlantic slave trade affect the region how did colonialism change the existing governments there readers will travel to sub saharan africa through primary sources informative text fact filled sidebars and breathtaking photographs to find the answers

if irrigated production is to make a significant contribution to food security and economic growth in sub saharan africa it will have to be re structured across the region as a whole this is the main conclusion of a study undertaken by fao to analyse the drivers of demand for irrigated production in sub saharan africa ssa steeply rising commercial food import bills for staple crops across ssa are indicative of the level demand that is not being met from domestic production the increase of area under equipped spate irrigation for the whole of africa over the last ten years amounts to 1 27 million ha which is equal to about 127 000

ha a year this rate of growth has proved too low to have an impact on food import bills and buffer regional food security however within subregional trading groups there is scope for consolidation of market supply irrigated production opportunities in ssa could be realised where natural resources and markets coincide but only through a great deal more attention to costs of production price formation effective water allocation mechanisms economically efficient water use and strong responsive institutions

recent research suggests that isolation from regional and international markets has contributed significantly to poverty in many sub saharan african countries numerous empirical studies identify poor transport infrastructure and border restrictions as significant deterrents to trade expansion in response the african development bank has proposed an integrated network of functional roads for the subcontinent drawing on new econometric results the authors quantify the trade expansion potential and costs of such a network they use spatial network analysis techniques to identify a network of primary roads connecting all sub saharan capitals and other cities with populations over 500 000 the authors estimate current overland trade flows in the network using econometrically estimated gravity model parameters road transport quality indicators actual road distances and estimates of economic scale for cities in the network then they simulate the effect of feasible continental upgrading by setting network transport quality at a level that is functional but less highly developed than existing roads in countries like south africa and botswana the authors assess the costs of upgrading with econometric evidence from a large world bank database of road project costs in africa using a standard approach to forecast error estimation they derive a range of potential benefits and costs their baseline results indicate that continental network upgrading would expand overland trade by about 250 billion over 15 years with major direct and indirect benefits for the rural poor financing the program would require about 20 billion for initial upgrading and 1 billion annually for maintenance the authors conclude with a discussion of supporting institutional arrangements and the potential cost of implementing them
