this thoroughly updated edition provides a comprehensive overview of two centuries of transnational feminist efforts to produce a more just global order. Mary Hawkesworth explores how social economic and political inequalities between men and women of different races, classes, ethnicities, and nationalities have been transformed over two centuries of globalization. Drawing on historical and contemporary examples, she demonstrates how women have forged international networks and alliances to address specific women's issues beyond the borders of the nation-state, crafting policies to mitigate pressing abuses and devising alternatives to liberal and neo-liberal agendas. The book considers innovative feminist tactics to produce global change, carefully tracing the structural forces that constrain transnational feminist activism. Hawkesworth illuminates the complexity of feminist strategies to influence international agencies and foundations, national governments, and transnational NGOs by providing critical new insights into the gendered nature of the global system and the gendered dynamics of international institutions and nation-states. This work will be invaluable for all those engaged in the interdisciplinary fields of globalization studies and feminist studies.

this book frames the major debates and contemporary issues in women's and gender studies in India. It locates them in the context of key theories, their interlinkages, and significant crossings and overlaps within the field. While juxtaposing feminist and queer perspectives, the essays in the volume foreground emerging challenges as well as offer clues to future trajectories for women's and gender studies in the country through a comprehensive and interdisciplinary survey of intersectionalities in feminist activism and theory, gender, caste, and class, feminist masculinity, queer and transgender studies, disability and feminism, feminist and queer pedagogies, and Indian, Western, and transnational feminisms. The volume traces how gender studies have shaped established social science as well as interpretative and representational discourses, psychoanalysis, literature, aesthetics, cinema, new media studies, and folklore. It examines their strategic potential to draw upon and transform these areas in national and international contexts. This book will be useful to students, teachers, and researchers in women's studies, gender studies, cultural studies, queer studies, and South Asian studies.

though the proportion of women in national assemblies still barely scrapes 16 on average, the striking outliers Rwanda with 49 of its assembly female, Argentina with 35, Liberia and Chile with new women presidents this year have raised expectations that there is an upward trend in women's representation from which we may expect big changes in the quality of governance. But getting women into public office is just the first step in the challenge of creating governance and accountability systems that respond to women's needs and protect their rights. Using case studies from around the world, the essays in this volume consider the conditions for effective connections between women in civil society and women in politics, for the evolution of political party platforms responsive to women's interests, for local government arrangements that enable women to engage effectively, and for accountability mechanisms that answer to women. The book's argument is that good governance from a gender perspective requires more than more women in politics; it requires fundamental incentive changes to orient public action and policy to support gender equality.
