traditional archaeological excavation methods are sometimes daunting due to
political or financial complications other times an improperly planned dig can
destroy or entirely overlook the features or artifacts being sought in either case
ground penetrating radar or gpr is an increasingly applicable technology but one that
few archaeologists truly understand that is where this book excels it is tailored
towards an archaeological community which is for the most part apprehensive about
using high tech instruments and feel more comfortable on their hands and knees
digging in the dirt its abundant illustrations and easy to understand tables help to
keep this potentially daunting subject matter accessible it also contains more
complex equations and theory so that the more technically oriented can use it as a
reference tool
