livy s ninth book one of his finest and most interesting begins with his celebrated account of the roman disaster in the caudine forks and its aftermath and contains also the famous digression on alexander and our longest account of the censorship of appius claudius caecus this

new commentary which is a sequel to those on books vi viii published in 1997 and 1998 deals comprehensively with all aspects of livy's work including the literary structure of his narrative the purpose of the digression on alexander the historical and topographical problems of the samnite wars roman politics in the age of appius claudius caecus the poetical and archaic language sometimes affected by livy and the numerous textual problems posed by the extant manuscripts

at the end of the second world war when the horror of the holocaust became known hannah arendt committed herself to a work of remembrance and reflection intellectual integrity demanded that we comprehend and articulate the genesis and meaning of totalitarian terror what earlier spiritual and moral collapse had made totalitarian regimes possible what was the basis of their evident mass appeal to what cultural resources and political institutions and traditions could we turn to prevent their recurrence after years of profound study arendt concluded that the deepest crisis of the modern world was political and that the enduring appeal of political mass movements demonstrated how profound that crisis had become for arendt the modern political crisis is also a crisis of humanism the radical totalitarian experiment was rooted in two distorted images of the human being the agents of terror believed in the limitless power generated by strategic organization a power exercised without restraint and justified by appeal to historical necessity the victims of terror by contrast were systematically dehumanized by the ruling ideology and then brutally deprived of their legal rights and their moral and existential dignity arendt's political humanism directly challenges both of these distorted images the first because it dangerously inflates human power the second because it deliberately subverts human freedom and agency this book offers a dialectical account of the political crisis that arendt identified and shows why her interpretation of that crisis is especially relevant today the author also provides detailed analysis and appraisal of arendt's political humanism the revisionary anthropology she based on the politically engaged republican citizen finally the work distinguishes the merits from the limitations of arendt's genealogical critique of our tradition of political thought showing that she tended to be right in what she affirmed and wrong in what she excluded or omitted

maarten wisse develops a critique of dominant trends in contemporary theology through a re-reading of augustine's *de trinitate* theological topics covered include the thinking about the relationship of between god and world as participation of the finite in the infinite christology as a manifestation of this ontology of participation trinity as a model for our relational mode of being and deification theosis as the purpose of salvation key figures are brought in conversation with an augustinian alternative to these trends such as wolfgang pannenberg joseph ratzinger denys turner john milbank catherine pickstock and graham ward

aristotle's *discovery of the human* offers a fresh illuminating and accessible analysis of one of the western philosophical tradition's most important texts in aristotle's *discovery of the human* noted political theorist mary p nichols explores the ways in which aristotle brings the gods and the divine into his philosophizing about human affairs in his *nicomachean ethics* her analysis shows that for aristotle both piety and politics are central to a flourishing human life aristotle argues that piety provides us not only an awareness of our kinship to the divine and

hence elevates human life but also an awareness of a divinity that we cannot entirely assimilate or fathom piety therefore supports a politics that strives for excellence at the same time that it checks excess through a recognition of human limitation proceeding through each of the ten books of the ethics nichols shows that this prequel to aristotle s politics is as theoretical as it is practical its goal of improving political life and educating citizens and statesmen is inseparable from its pursuit of the truth about human beings and their relation to the divine in the final chapter which turns to contemporary political debate nichols s suggestion of the possibility of supplementing and deepening liberalism on aristotelian grounds is supported by the account of human nature virtue friendship and community developed throughout her study of the ethics
