David Busch's Canon EOS R10 Guide to Digital Photography is your all-in-one comprehensive resource and reference for the highly affordable APS-C format Canon EOS R10. Beginners and budding enthusiasts alike will appreciate this 24-megapixel camera's action-friendly 23 frames per second continuous shooting capabilities, image stabilization built into many RF-mount lenses, including two all-new RF-S optics introduced with the camera. Virtually eliminates blur from camera shake at slow shutter speeds. Three available adapters make it easy to supplement your RF-mount lenses with a broad selection of legacy Canon EF and EF-S lenses. The R10 has wireless connectivity to computers and smart devices and high-definition 4K and full HD movie-making capabilities. With this book in hand, you can quickly apply all these advanced features to your digital photography while boosting your creativity to take great photographs with your Canon EOS R10. Filled with detailed how-to steps and full-color illustrations, David Busch's Canon EOS R10 Guide to Digital Photography covers all this upscale camera's features in depth, from taking your first photos through advanced details of setup, exposure, lens selection, lighting, and more, and relates each feature to specific photographic techniques and situations. Also included is the handy Roadmap chapter, an easy-to-use visual guide to the camera's features and controls, learn when to use each option, and more importantly, when not to use them, by following the author's recommended settings for every menu entry. With best-selling photographer and mentor David Busch as your guide, you'll quickly have full creative mastery of your camera's capabilities. Whether you're shooting on the job as an advanced enthusiast or are just out for fun, start building your knowledge and confidence while bringing your vision to light with the Canon EOS R10.

Truly personal handheld and wearable technologies should be small and unobtrusive and allow access to information and computing most of the time and in most circumstances. Complimentary environment-based technologies make artifacts of our surrounding world computationally accessible and facilitate use of everyday environments as a ubiquitous computing interface. The International Symposium on Handheld and Ubiquitous Computing, held for the first time in September 1999, was initiated to investigate links and synergies in these developments and to relate advances in personal technologies to those in environment-based technologies. The HUC 99 symposium was organized by the University of Karlsruhe, in particular by the Telecooperation Office (TECO) of the Institute for Telematics, in close collaboration with ZKM Karlsruhe, which generously hosted the event in its truly inspiring center for arts and media technology. The symposium was supported by the Association of Computing Machinery (ACM) and the German Computer Society (Gesellschaft für Informatik, GI) and held in cooperation with a number of special interest groups of these scientific societies. HUC 99 attracted a large number of paper submissions from

which the international programme committee selected 23 high quality contributions for presentation at the symposium and for inclusion in these proceedings in addition posters were solicited to provide an outlet for novel ideas and late breaking results selected posters are also included with these proceedings the technical programme was further complemented by four invited keynote addresses and two panel sessions
