we report a study of one aspect of the changing industrial landscape the use of virtual team working in the supply chain the supply chain is the group of companies that are involved in the design and manufacture and distribution of products notably complex products such as cars supply chain partnerships often involve cross company team working and as members of such teams are rarely colocated virtual team working supported by it offers considerable potential benefits companies hope that these technologies can be used to support distributed computer supported collaborative working for purposes such as concurrent engineering and it is this kind of virtual teaming which we decided to investigate we believe that exploring how

virtual teams communicate is an effective way of examining how well they are operating and identifying the impacts of the technologies on their interactions in the workplace free and open communication is considered to be very important to organizations facing a rapidly changing business environment similarly free and equal communication among members has been reported to be important if genuine team working is to be implemented in the workplace carletta et al 1998 if organizations are to derive benefits such as innovative problem solving from virtual team working then such open communication seems desirable communications technologies such as videoconferencing shared applications etc clearly offer the possibilities of such communications among geographically distributed or virtual teams

this book presents a comprehensive overview of extant literature on competence based vocational and professional education since the introduction of the competence concept in the 1950s to structure the field the book distinguishes between three approaches to defining competence based on 1 functional behaviourism 2 integrated occupationalism and 3 situated professionalism it also distinguishes between two ways of operationalizing competence 1 behaviour oriented generic and 2 task oriented specific competence lastly it identifies three kinds of competencies related to 1 specific activities 2 known jobs and 3 the unknown future competence for the unknown future must receive more attention as our world is rapidly evolving and there are many global challenges which call for innovation and a profound transformation of policies and practices the book presents a range of different approaches to competence based education and demonstrates that competencebased education is a worldwide innovation which is institutionalized in various ways it presents the major theories and policies specific components of educational systems such as recognition accreditation modelling and assessment and developments in discipline oriented and transversal competence domains the book concludes by synthesizing the different perspectives with the intention to

contribute to further improving vocational and professional education policy and practice joao santos deputy head of unit c5 vocational training and adult education directorate general for employment social affairs and inclusion european commission this comprehensive work on competence based education led by martin mulder provides an excellent and timely contribution to the current debate on a new skills agenda for europe and the challenge of bridging the employment and education and training worlds closer together this book will influence our work aimed at improving the relevance of vocational education to support initial and continuing vocational education and training policy and practice aimed at strengthening the key competencies for the 21st century prof dr reinhold weiss deputy president and head of the research federal institute for vocational education and training bibb bonn germany this book illustrates that the idea and concept of competence is not only a buzzword in educational debates but key to innovative pedagogical thinking as well as educational practice prof dr johanna lasonen college of education university of south florida tampa usa competence based vocational and professional education is one of the most important multi disciplinary book in education and training this path breaking book offers a timely rich and global perspective on the field the book is a good resource for practitioners policymakers and researchers

since the first edition of the site usability handbook was published in 2000 there have been numerous changes in the technology world after the dot com bubble burst corporate training and education budgets were cut severely and investment in new technology businesses slowed down but today things have turned around again and behind the scenes at technology companies usability specialists are still quietly working to make the electronic world easier to manage this second edition provides the new insights and guidance needed to help make usability an effective and enjoyable journey every word from the first edition of this book has been revised or at least heavily reconsidered and in many cases whole sections have been removed or rewritten

entirely while other sections are completely new to this edition the casual and conversational tone of the first edition has also changed because the current wave of usability specialists embodies a much higher degree of training and knowledge of basic science the goals of the book however have not changed to train those concerned with usability how to understand it as one piece of the large technology puzzle that is affecting and shaping the human and natural worlds usability is an art and a science but it is also an obligation we have to society accessibility and usability form the foundation of human enabling technology that is technology that serves us rather than technology that we serve everything from understanding the human factors of design and how to generate user centered designs to accessibility usability metrics heuristic evaluation and testing are detailed whether you are a usability professional seeking methods for transforming data into change or a web designer seeking guidance for making your sites easier to navigate you'll find information and practical tools you can apply to your own sites today

the entire training industry is undergoing dramatic change as training is moved out of traditional classrooms and onto the training publications and conferences are now dominated by speakers writers and vendors talking about e learning the e learning revolution is forcing companies to spend millions on new technology and new web based courseware threatening the role of traditional classroom trainers and saving companies millions of dollars in housing and travel costs because trainees no longer need a plane ticket and 3 nights accommodation to attend a corporate training program the training can be delivered to each learner's desktop over the but because e learning is still in the revolution stage there are no clear standards and models for how to create and deliver e learning successfully everyone is asking the same questions how does web based training fit in with traditional classroom based training what are the standards for designing high quality e learning how much interaction with an instructor do e learning participants need what is the role of the instructional designer in online learning the astd e learning
