globalization and high speed communication put twenty first century people in contact with adherents to a wide variety of world religions but usually valuable knowledge of these other traditions is limited at best on the one hand religious stereotypes abound hampering a serious exploration of unfamiliar philosophies and practices on the other hand the popular idea that all religions lead to the same god or the same moral life fails to account for the distinctive origins and radically different teachings found across the world's many religions understanding world religions presents religion as a complex and intriguing matrix of history philosophy culture beliefs and practices hexham believes that a certain degree of objectivity and critique is inherent in the study of religion and he guides readers in responsible ways of carrying this out of particular importance is hexham's decision to explore african religions which have frequently been absent from major religion texts he surveys these in addition to varieties of hinduism buddhism judaism christianity and islam

The concept of religious freedom is the favoured modern human rights concept with which the modern world hopes to tackle the phenomenon of religious pluralism as our modern existence in an electronically shrinking globe comes to be increasingly characterised by this phenomenon to begin with the concept of religious freedom as embodied in Article 18 of the Universal Declaration of Human Rights seems self evident in nature it is the claim of this book however that although emblematic on the one hand the concept is also problematic on the other and the implications of the concept of religious freedom are far from self evident despite the ready acceptance the term receives as embodying a worthwhile goal this book therefore problematizes the concept along legal constitutional ethical and theological lines and especially from the perspective of religious studies so that religious freedom in the world could be enlarged in a way which promotes human flourishing

This fast paced inspiring and original work proposes that if religions fade then secular law provides a much more comprehensive moral regime to govern our lives backed by potent and haunting images it argues that the rule of law is the one universal framework that everyone believes in and that the law is now the most important ideology we have for our survival the author explores the decline of religions and the huge growth of law and makes predictions for the future of law and lawyers the book maintains that even though societies may decide they can do without religions they cannot do without law the book helpfully summarises both the teachings of all the main religions and the central tenets of the law governing everything from human relationships to money banks and corporations it shows that without these legal constructs some of them arcane our societies would grind to a halt these innovative summaries make complex ideas seem simple and provide the keys to understanding both the law and religion globally the book will appeal to both lawyers and the general reader the book concludes with the author's personal code for a modern way of living to promote the survival of humankind into the future vividly written by one of the most important lawyers of our generation this magisterial and exciting work offers a powerful vision of the role of law in centuries to come and its impact on how we stay alive

the revised essays collected here four of which are published for the first time continue a longstanding argument made by mccutcheon and others that the study of religion would benefit from self conscious scrutiny of its tools the interests that may drive them and the effects that might follow their use the chapters examine a variety of contemporary sites in the modern field where this thesis can be argued whether involving the anachronistic use of the category religion when studying the ancient world to current interest in so called critical religion or critical realist approaches moreover contrary to some past characterizations of such critiques a constructive way forward for the field is once again recommended and at several sites exemplified in detail redescribing not only religion as something ordinary but also our tendency to create the impression of exceptional and thus set apart things places and people aimed at scholars and students alike the book is an invitation to examine our own scholarly practices and thereby take a more active role in shaping the field in which we carry out our work as scholars of this thing we call religion
