one of the century's most spectacular archaeological finds occurred in 1921 a year before Howard Carter stumbled upon Tutankhamun's tomb when Poul Norlund recovered dozens of garments from a graveyard in the Norse settlement of Herjolfsnæs Greenland preserved intact for centuries by the permafrost these mediaeval garments display remarkable similarities to Western European costumes of the time previously such costumes were known only from contemporary illustrations and the Greenland finds provided the world with a close look at how ordinary Europeans dressed in the Middle Ages. Fortunately for Norlund's team wood has always been extremely scarce in Greenland and instead of caskets many of the bodies were found swaddled in multiple layers of cast-off clothing when he wrote about the excavation later Norlund also described how occasional thaws had permitted crowberry and dwarf willow to establish themselves in the top layers of soil their roots grew through coffins clothing and corpses alike binding them together in a vast network of thin fibers as if he wrote the finds had been literally sewn in the earth. Eighty years of technical advances and subsequent excavations have greatly added to our understanding of the Herjolfsnæs discoveries woven into the earth recounts the dramatic story of Norlund's excavation in the context of other Norse textile finds in Greenland it then describes what the finds tell us about the materials and methods used in making the clothes the weaving and sewing techniques detailed here are surprisingly sophisticated and one can only admire the talent of the women who employed them especially considering the harsh

conditions they worked under while woven into the earth will be invaluable to students of medieval archaeology norse society and textile history both lay readers and scholars are sure to find the book's dig narratives and glimpses of life among the last vikings fascinating

Twenty chapters present the range of current research into the study of textiles and dress in classical antiquity stressing the need for cross and interdisciplinarity study in order to gain the fullest picture of surviving material issues addressed include the importance of studying textiles to understand economy and landscape in the past different types of embellishments of dress from weaving techniques to the late introduction of embroidery the close links between the language of ancient mathematics and weaving the relationships of iconography to the realities of clothed bodies including a paper on the groundbreaking research on the polychromy of ancient statuary dye recipes and methods of analysis case studies of garments in spanish viennese and greek collections which discuss methods of analysis and conservation analyses of textile tools from across the mediterranean discussions of trade and ethnicity to the workshop relations in roman fulleries multiple aspects of the production of textiles and the social meaning of dress are included here to offer the reader an up to date account of the state of current research the volume opens up the range of questions that can now be answered when looking at fragments of textiles and examining written and iconographic images of dressed individuals in a range of media the volume is part of a pair together with prehistoric ancient near eastern and aegean textiles and dress an interdisciplinary anthology edited by mary harlow cécile michel and marie louise nosch

D Tex is proposed as a hub around which it is possible to look at textiles in their different forms in order to better understand, study, adapt and project them for the future. It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and concepts and work them in their own way adapting them to their objectives and research. D Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations present in all areas of knowledge. The textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge. D Tex proposes to promote discussion and knowledge in the different areas where textiles with all their characteristics can ensure an important contribution combining material and immaterial knowledge innovative and traditional techniques technological and innovative materials and methods but also new organization and service models different concepts and views on teaching with the renewed idea of the intrinsic interdisciplinarity of design and sharing with different areas that support each other. The research and practice of textiles was proposed by the D Tex textile design conference 2019 held June 19-21 2019 at the Lisbon School of Architecture of the University of Lisbon Portugal under the theme 'In Touch' where as broadly understood as possible different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and consumers.
