book cover inner success is a small smart book that leads readers to get more in touch with the workings of their inner self even more than that it provides a blueprint for making those inner mechanisms work more smoothly as each of us has an inner self and often wrestles with that inner self the subject matter of this book should be personally significant to anyone who happens to pick it up inner success is not a heady scholarly tome but rather is simply written to create a larger self awareness and self satisfaction in people who may have thought very little about how they function internally to say that inner success is introspective would be an understatement it looks completely inward it is an easy conversational *tete a tete* that leads readers to identify and sort out many of their own internal workings it helps to locate the thing called inner self and then identifies processes that are constantly at work in that private world perceiving evaluating emotionally reacting and many more as we identify in the book inner self is a very individual thing because of this we believe that every reader will come away with something different but each in their own way will develop a more intimate understanding of their inner self and what's going on when they are alone behind that curtain the ultimate goal of the book is to help the reader define what success can feel like and then give the reader some tools to better achieve a larger inner success of their own

an excerpt from the preface many books have been written and will continue to be written about the intricacies and mysteries of the mind the very multiplicity and diversity of mental processes and the dominant role they play in determining happiness or misery success or failure indicate the interest everyone should feel in them out of the wealth of data sometimes conflicting which has been laboriously gathered by scientific investigators sufficient information has been correlated to make at least certain mental reactions understandable theories based upon this attested knowledge are found to be of practical use in everyday life nobody can afford to treat carelessly or in a scoffing spirit the trend of scientific thought on so vital a subject the brain is the controlling sensitizer the switchboard of the entire organism organic and functional an insight into its workings cannot fail to be invaluable to any individual the scientist is no longer satisfied with the older effect psychology which confined itself to observing the results merely of brain activity but he looks deeper and searches for causes and reasons if he can discover why a person behaves in such and such a way under certain circumstances rather than in some other manner he will in time be able to regulate the cause i.e. the mental process and wisely to direct the effect i.e. the behaviour itself we are beginning to realize that men and women despite hereditary influences are not the victims of fatalistic predetermination they can in large measure become captains of their souls if they only know how

knowledge of the inner self is essential to self mastery no human being can hope to guide his own craft toward efficiency and happiness unless he is honest and plucky enough to acknowledge his weaknesses and has the courage and persistence to probe his inmost thoughts and face what he finds there a dreaded disease is betrayed to a doctor's eye by unmistakable symptoms for the patient to deny the presence of the disease and refuse the regimen necessary to its cure can result only in a life of invalidism shortened and suffering nor can a refusal to admit a basic fault of character signs of which jump to the eye of a trained observer have other result than a lifelong handicap carrying imminent risk of disaster
